Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

Dividend Fund (Mackenzie) SF565

Supplemental Information (unaudited)

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

Portfolio Turnover Rate (%) ⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	5.16	7.38	3.66	76.44	25.45

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

GLOBAL BALANCED PORTFOLIO FUND 1.04FID

December 31, 2024

Independent Auditor's Report

To the Contractholders of Global Balanced Portfolio Fund 1.04FID (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Global Balanced Portfolio Fund 1.04FID

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Global Balanced Portfolio Fund 1.04FID (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Global Balanced Portfolio Fund 1.04FID

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Global Balanced Portfolio Fund 1.04FID

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Global Balanced Portfolio Fund 1.04FID

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Global Balanced Portfolio Fund 1.04FID

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

Global Balanced Portfolio Fund 1.04FID

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Global Balanced Portfolio Fund 1.04FID

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

Global Balanced Portfolio Fund 1.04FID

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

Global Balanced Portfolio Fund 1.04FID

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	2.79	6.21	7.20	3.14	1.43

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

GLOBAL INCOME PORTFOLIO FUND 1.03FID

December 31, 2024

Independent Auditor's Report

To the Contractholders of Global Income Portfolio Fund 1.03FID (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Global Income Portfolio Fund 1.03FID

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Global Income Portfolio Fund 1.03FID (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Global Income Portfolio Fund 1.03FID

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Global Income Portfolio Fund 1.03FID

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Global Income Portfolio Fund 1.03FID

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Global Income Portfolio Fund 1.03FID

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Global Income Portfolio Fund 1.03FID

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

Global Income Portfolio Fund 1.03FID

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Global Income Portfolio Fund 1.03FID

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

Global Income Portfolio Fund 1.03FID

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

Global Income Portfolio Fund 1.03FID

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

Global Income Portfolio Fund 1.03FID

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	2.75	2.73	2.72	2.71	2.67
75/100 guarantee policy	3.03	3.01	3.00	2.99	2.94
PS1 75/75 guarantee policy	2.39	2.37	2.37	2.37	2.32
PS1 75/100 guarantee policy	2.68	2.65	2.65	2.65	2.60

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	9.03	8.20	6.45	7.99	2.71

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
GLOBAL GROWTH BALANCED FUND 1.02MAC

December 31, 2024

Independent Auditor's Report

To the Contractholders of Global Growth Balanced Fund 1.02MAC (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Global Growth Balanced Fund 1.02MAC

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Global Growth Balanced Fund 1.02MAC (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Global Growth Balanced Fund 1.02MAC

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Global Growth Balanced Fund 1.02MAC

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Global Growth Balanced Fund 1.02MAC

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Global Growth Balanced Fund 1.02MAC

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Global Growth Balanced Fund 1.02MAC

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

Global Growth Balanced Fund 1.02MAC

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Global Growth Balanced Fund 1.02MAC

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

Global Growth Balanced Fund 1.02MAC

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Mackenzie Financial Corporation, which operates as Mackenzie Investments. All investment transactions with the corresponding underlying funds are at quoted market prices.

Global Growth Balanced Fund 1.02MAC

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

Portfolio Turnover Rate (%) ⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	9.21	9.17	14.49	3.62	7.12

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Independent Auditor's Report

To the Contractholders of Global Value Balanced Fund 1.01BG (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Global Value Balanced Fund 1.01BG

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

Introduction

The objective of the Global Value Balanced Fund 1.01BG (the Fund) in managing risk is the creation and protection of contractholder value. Risk is inherent in the Fund's activities, but it is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. The process of risk management is critical to the Fund's continuing profitability. The Fund can be exposed to liquidity risk, market risk (which includes currency risk, interest rate risk and other price risk) and credit risk arising from the financial instruments it holds.

A. Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024, and groups the securities by asset type, geographic region and/or market segment. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, The Canada Life Assurance Company (Canada Life or the Company) maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations.

B. Liquidity Risk

Liquidity risk arises when a fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units by contractholders. The Fund retains sufficient cash and cash equivalent positions to maintain adequate liquidity to meet the obligation to fund daily cash redemptions of their redeemable units.

Some securities are illiquid due to legal restrictions on their resale, the nature of the investment, or simply a lack of interested buyers for a particular security or security type. Certain securities may become less liquid due to changes in market conditions, such as interest rate changes or market volatility, which could impair the ability of a fund to sell such securities quickly.

In accordance with the Fund's policy, the Company monitors the Fund's liquidity positions on a regular basis.

C. Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The classifications used on the Schedule of Investment Portfolio for the financial instruments are based on the country of issue.

Global Value Balanced Fund 1.01BG

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

C. Currency Risk (continued)

The table below indicates the foreign currencies to which the Fund had significant exposure as at December 31, 2024 in Canadian dollar terms, including the underlying principal amount of forward currency contracts, if any. The table also illustrates the potential impact to the Fund's net assets attributable to contractholders, all other variables held constant, as a result of a 1% change in these currencies relative to the Canadian dollar. In practice, the actual results may differ from this sensitivity analysis and the difference could be significant.

2024

Currency	Investments	Cash, Short-term Deposits and Overdrafts	Total*	Impact on Net Assets Attributable to Contractholders
United States Dollar	\$ 28,724	\$ —	\$ 28,724	\$ 287
Euro	3,747	—	3,747	37
United Kingdom Pound Sterling	2,372	—	2,372	24
Other Currencies	4,473	—	4,473	45
Total	\$ 39,316	\$ —	\$ 39,316	\$ 393
As Percent of Net Assets Attributable to Contractholders				66.2%
				0.7%

*Includes both monetary and non-monetary instruments

2023

Currency	Investments	Cash, Short-term Deposits and Overdrafts	Total*	Impact on Net Assets Attributable to Contractholders
United States Dollar	\$ 18,412	\$ 10	\$ 18,422	\$ 184
Euro	2,106	—	2,106	21
United Kingdom Pound Sterling	1,445	—	1,445	15
Other Currencies	3,241	—	3,241	32
Total	\$ 25,204	\$ 10	\$ 25,214	\$ 252
As Percent of Net Assets Attributable to Contractholders				66.6%
				0.7%

*Includes both monetary and non-monetary instruments

D. Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund is exposed to the risk that the value of interest-bearing financial instruments will fluctuate due to changes in the prevailing levels of market interest rates. Due to the nature of short-term fixed income securities with a remaining term-to-maturity of less than one year, these investments are not generally exposed to a significant risk that their value will fluctuate in response to changes in the prevailing levels of market interest rates. The risk is professionally managed at the security and fund level by the Company.

Global Value Balanced Fund 1.01BG

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

D. Interest Rate Risk (continued)

The table below summarizes the Fund's exposure to interest rate risk by remaining term-to-maturity.

2024					
	1 year or less	Over 1 year to 5 years	Over 5 years to 10 years	Over 10 years	Total
Bonds	\$ 415	\$ 4,459	\$ 5,870	\$ 5,142	\$ 15,886

2023					
	1 year or less	Over 1 year to 5 years	Over 5 years to 10 years	Over 10 years	Total
Bonds	\$ —	\$ 2,771	\$ 3,981	\$ 3,297	\$ 10,049

As at December 31, 2024, had prevailing interest rates increased or decreased by 1% assuming a parallel shift in the yield curve, with all other variables held constant, net assets attributable to contractholders would have decreased or increased, respectively, by approximately \$1,228 (\$789 at December 31, 2023) or approximately 2.1% (2.1% at December 31, 2023). The Fund's sensitivity to interest rate changes was estimated using the weighted average duration of the bond portfolio. In practice, the actual results may differ and the difference could be significant.

E. Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund's greatest concentration of credit risk is in debt securities, such as bonds. The fair value of debt instruments includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt instruments represents the maximum credit risk exposure as at December 31, 2024. The amount of credit risk to any one issuer may be determined from the information reported in the Schedule of Investment Portfolio. The Fund may invest in short-term fixed income securities issued or guaranteed primarily by the Government of Canada or any Canadian provincial government, obligations of Canadian chartered banks or trust companies, and commercial paper with approved credit ratings. The risk of default on these short-term fixed income securities is considered low. The Company monitors credit risk and credit ratings on a regular basis. All new counterparties to financial instruments are subject to an approval process.

There was no change in fair values of financial liabilities as a result of changes in credit risks during 2024 or 2023.

All transactions in listed securities are settled and paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker.

Credit ratings disclosed below are obtained from independent rating agencies including DBRS, Standard & Poor's, Moody's Investors Service and Fitch Ratings. The lowest rating provided by the agencies is used.

Global Value Balanced Fund 1.01BG

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

E. Credit Risk (continued)

Debt securities by credit rating are as follows:

	2024		2023	
	Percent of Total Bonds (%)	Percent of Total Net Assets Attributable to Contractholders (%)	Percent of Total Bonds (%)	Percent of Total Net Assets Attributable to Contractholders (%)
AAA	—	—	0.4	0.1
AA	53.4	14.3	32.6	8.7
A	16.9	4.5	39.7	10.5
BBB	19.1	5.1	21.4	5.7
BB and lower	10.6	2.8	5.9	1.6
Total	100.0	26.7	100.0	26.6

F. Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. The Fund Manager moderates this risk through careful selection of securities and other financial instruments within the parameters of the investment strategy. The maximum risk resulting from financial instruments is equivalent to their fair value.

For the Fund, the most significant exposure to other price risk arises from its investment in equity securities. As at December 31, 2024, had the prices on the respective stock exchanges for these securities increased or decreased by 1%, with all other variables held constant, assets would have increased (or decreased) by approximately \$413 (\$264 at December 31, 2023) or approximately 0.7% (0.7% at December 31, 2023) of total net assets attributable to contractholders. In practice, the actual results may differ and the difference could be significant.

Global Value Balanced Fund 1.01BG

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

G. Fair Value Classification

The following table presents information about the Fund's assets and liabilities measured at fair value on a recurring basis and indicates the fair value hierarchy of the valuation techniques utilized by the Fund to determine such fair value:

		2024			
		Assets and Liabilities Measured at Fair Value			
<u>Assets measured at fair value</u>		Level 1	Level 2	Level 3	Total
Bonds	\$	—	\$ 15,886	\$ —	\$ 15,886
Stocks		35,561	5,760	—	41,321
Total assets measured at fair value	\$	35,561	\$ 21,646	\$ —	\$ 57,207

		2023			
		Assets and Liabilities Measured at Fair Value			
<u>Assets measured at fair value</u>		Level 1	Level 2	Level 3	Total
Bonds	\$	—	\$ 10,049	\$ —	\$ 10,049
Stocks		26,436	—	—	26,436
Total assets measured at fair value	\$	26,436	\$ 10,049	\$ —	\$ 36,485

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for certain non-North American equities when North American intraday stock market movements exceed predetermined tolerances. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. If fair value adjustment factors are applied, non-North American equities are classified as Level 2. Consequently, non-North American equities are frequently transferred between Level 1 (unadjusted quoted market prices) and Level 2 (adjusted market prices). As at December 31, 2024, these securities were classified as Level 2 (Level 1 at December 31, 2023).

Global Value Balanced Fund 1.01BG

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Fund is offered by The Canada Life Assurance Company.

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Global Value Balanced Fund 1.01BG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Global Value Balanced Fund 1.01BG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in fair value measurements in the notes to the Schedule of Investment Portfolio.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Global Value Balanced Fund 1.01BG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Bonds and Stocks

Bonds and stocks are recorded at fair value determined with reference to closing quoted market prices, where the last traded price falls within the day's bid-ask spread, primarily provided by third party independent pricing sources. Fair values are determined on the basis of the closing price for a security on the recognized exchange on which it is principally traded at each reporting date. In circumstances where the last traded price is not within the bid-ask spread, the Company determines the point when the bid-ask spread that is most representative of fair value based on the specific facts and circumstances.

The fair value of unlisted securities is established using quotations determined by a major dealer in a particular security. Should the quoted value for a security, in the opinion of the Fund Manager, be inaccurate, unreliable, or not readily available, the value of the security is estimated using valuation techniques. Valuation techniques include the market approach (using recent arm's-length market transactions adjusted as necessary and reference to the current market value of another instrument that is substantially the same) and the income approach (discounted cash flow analysis and option pricing models making as much use of available and supportable market data as possible).

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

Interest income on debt securities - included in the change in fair value of such investments and recorded on the accrual basis.

Dividend income - accrued as of the ex-dividend date and recorded on the accrual basis.

Global Value Balanced Fund 1.01BG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

Miscellaneous income (loss)

Miscellaneous income (loss) generally includes the changes in foreign exchange rates between trade and settlement dates, foreign exchange rates on bank balances, securities lending income, derivative income, and management fee rebates.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

Global Value Balanced Fund 1.01BG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

k) Income Allocation

Net gain (loss) on investments, which includes dividend income, interest income, realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the net asset value (NAV) per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Transaction Costs

Transaction costs, such as brokerage commissions, incurred in the purchase and sale of securities by the Fund are charged to expenses in the year.

n) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

Global Value Balanced Fund 1.01BG

Notes to the Financial Statements

(in Canadian \$ thousands)

3. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Global Value Balanced Fund 1.01BG

Notes to the Financial Statements

(in Canadian \$ thousands)

4. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

5. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

6. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

7. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	53.82	49.15	34.08	78.64	42.21

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
GLOBAL MULTI-SECTOR BOND FUND 1.06TRP

December 31, 2024

Independent Auditor's Report

To the Contractholders of Global Multi-Sector Bond Fund 1.06TRP (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Global Multi-Sector Bond Fund 1.06TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Global Multi-Sector Bond Fund 1.06TRP (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Global Multi-Sector Bond Fund 1.06TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Global Multi-Sector Bond Fund 1.06TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Global Multi-Sector Bond Fund 1.06TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Global Multi-Sector Bond Fund 1.06TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Global Multi-Sector Bond Fund 1.06TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

Global Multi-Sector Bond Fund 1.06TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

Portfolio units are those units owned by the Asset Allocation Funds. Each Portfolio fund is represented by a separate category.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Global Multi-Sector Bond Fund 1.06TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

Global Multi-Sector Bond Fund 1.06TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

Global Multi-Sector Bond Fund 1.06TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

Global Multi-Sector Bond Fund 1.06TRP

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020

Portfolio Turnover Rate (%) ⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	6.92	9.66	16.93	14.97	0.32

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Financial Statements of
THE CANADA LIFE ASSURANCE COMPANY
GLOBAL EQUITY FUND 1.08CG

December 31, 2024

Independent Auditor's Report

To the Contractholders of Global Equity Fund 1.08CG (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Global Equity Fund 1.08CG

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Global Equity Fund 1.08CG (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Global Equity Fund 1.08CG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Global Equity Fund 1.08CG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Global Equity Fund 1.08CG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Global Equity Fund 1.08CG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Global Equity Fund 1.08CG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

Global Equity Fund 1.08CG

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Global Equity Fund 1.08CG

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

Global Equity Fund 1.08CG

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

Global Equity Fund 1.08CG

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

Global Equity Fund 1.08CG

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020

Portfolio Turnover Rate (%) ⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	11.21	8.39	11.13	13.30	1.38

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

GLOBAL FOUNDERS FUND 1.00BG

December 31, 2024

Independent Auditor's Report

To the Contractholders of Global Founders Fund 1.00BG (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Global Founders Fund 1.00BG

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

Introduction

The objective of the Global Founders Fund 1.00BG (the Fund) in managing risk is the creation and protection of contractholder value. Risk is inherent in the Fund's activities, but it is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. The process of risk management is critical to the Fund's continuing profitability. The Fund can be exposed to liquidity risk, market risk (which includes currency risk, interest rate risk and other price risk) and credit risk arising from the financial instruments it holds.

A. Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024, and groups the securities by asset type, geographic region and/or market segment. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, The Canada Life Assurance Company (Canada Life or the Company) maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations.

B. Liquidity Risk

Liquidity risk arises when a fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units by contractholders. The Fund retains sufficient cash and cash equivalent positions to maintain adequate liquidity to meet the obligation to fund daily cash redemptions of their redeemable units.

Some securities are illiquid due to legal restrictions on their resale, the nature of the investment, or simply a lack of interested buyers for a particular security or security type. Certain securities may become less liquid due to changes in market conditions, such as interest rate changes or market volatility, which could impair the ability of a fund to sell such securities quickly.

In accordance with the Fund's policy, the Company monitors the Fund's liquidity positions on a regular basis.

C. Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The classifications used on the Schedule of Investment Portfolio for the financial instruments are based on the country of issue.

Global Founders Fund 1.00BG

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

C. Currency Risk (continued)

The table below indicates the foreign currencies to which the Fund had significant exposure as at December 31, 2024 in Canadian dollar terms, including the underlying principal amount of forward currency contracts, if any. The table also illustrates the potential impact to the Fund's net assets attributable to contractholders, all other variables held constant, as a result of a 1% change in these currencies relative to the Canadian dollar. In practice, the actual results may differ from this sensitivity analysis and the difference could be significant.

2024

Currency	Investments	Cash, Short-term Deposits and Overdrafts	Total*	Impact on Net Assets Attributable to Contractholders
United States Dollar	\$ 23,597	\$ —	\$ 23,597	\$ 236
Euro	3,729	—	3,729	37
United Kingdom Pound Sterling	2,381	—	2,381	24
Other Currencies	4,422	—	4,422	44
Total	\$ 34,129	\$ —	\$ 34,129	\$ 341
As Percent of Net Assets Attributable to Contractholders			91.7%	0.9%

*Includes both monetary and non-monetary instruments

2023

Currency	Investments	Cash, Short-term Deposits and Overdrafts	Total*	Impact on Net Assets Attributable to Contractholders
United States Dollar	\$ 16,308	\$ 2	\$ 16,310	\$ 163
Euro	2,261	—	2,261	23
United Kingdom Pound Sterling	1,552	—	1,552	16
Other Currencies	3,480	2	3,482	34
Total	\$ 23,601	\$ 4	\$ 23,605	\$ 236
As Percent of Net Assets Attributable to Contractholders			93.6%	0.9%

*Includes both monetary and non-monetary instruments

D. Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. The Fund Manager moderates this risk through careful selection of securities and other financial instruments within the parameters of the investment strategy. The maximum risk resulting from financial instruments is equivalent to their fair value.

For the Fund, the most significant exposure to other price risk arises from its investment in equity securities. As at December 31, 2024, had the prices on the respective stock exchanges for these securities increased or decreased by 1%, with all other variables held constant, assets would have increased (or decreased) by approximately \$359 (\$249 at December 31, 2023) or approximately 1.0% (1.0% at December 31, 2023) of total net assets attributable to contractholders. In practice, the actual results may differ and the difference could be significant.

Global Founders Fund 1.00BG

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

E. Fair Value Classification

The following table presents information about the Fund's assets and liabilities measured at fair value on a recurring basis and indicates the fair value hierarchy of the valuation techniques utilized by the Fund to determine such fair value:

		2024			
		Assets and Liabilities Measured at Fair Value

In accordance with the Fund's valuation policy, the Fund applies fair value adjustment factors to the quoted market prices for certain non-North American equities when North American intraday stock market movements exceed predetermined tolerances. The adjustment factors are applied in order to estimate the impact on fair values of events occurring between the close of the non-North American stock markets and the close of business for the Fund. If fair value adjustment factors are applied, non-North American equities are classified as Level 2. Consequently, non-North American equities are frequently transferred between Level 1 (unadjusted quoted market prices) and Level 2 (adjusted market prices). As at December 31, 2024, these securities were classified as Level 2 (Level 1 at December 31, 2023).

Global Founders Fund 1.00BG

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Fund is offered by The Canada Life Assurance Company.

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Global Founders Fund 1.00BG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Global Founders Fund 1.00BG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in fair value measurements in the notes to the Schedule of Investment Portfolio.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Global Founders Fund 1.00BG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Stocks

Stocks are recorded at fair value determined with reference to closing quoted market prices, where the last traded price falls within the day's bid-ask spread, primarily provided by third party independent pricing sources. Fair values are determined on the basis of the closing price for a security on the recognized exchange on which it is principally traded at each reporting date. In circumstances where the last traded price is not within the bid-ask spread, the Company determines the point when the bid-ask spread that is most representative of fair value based on the specific facts and circumstances.

The fair value of unlisted securities is established using quotations determined by a major dealer in a particular security. Should the quoted value for a security, in the opinion of the Fund Manager, be inaccurate, unreliable, or not readily available, the value of the security is estimated using valuation techniques. Valuation techniques include the market approach (using recent arm's-length market transactions adjusted as necessary and reference to the current market value of another instrument that is substantially the same) and the income approach (discounted cash flow analysis and option pricing models making as much use of available and supportable market data as possible).

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

Dividend income - accrued as of the ex-dividend date and recorded on the accrual basis.

Global Founders Fund 1.00BG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

Miscellaneous income (loss)

Miscellaneous income (loss) generally includes the changes in foreign exchange rates between trade and settlement dates, foreign exchange rates on bank balances, securities lending income, derivative income, and management fee rebates.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

Global Founders Fund 1.00BG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

k) Income Allocation

Net gain (loss) on investments, which includes dividend income, realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the net asset value (NAV) per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Transaction Costs

Transaction costs, such as brokerage commissions, incurred in the purchase and sale of securities by the Fund are charged to expenses in the year.

n) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

Global Founders Fund 1.00BG

Notes to the Financial Statements

(in Canadian \$ thousands)

3. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

Portfolio units are those units owned by the Asset Allocation Funds. Each Portfolio fund is represented by a separate category.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Global Founders Fund 1.00BG

Notes to the Financial Statements

(in Canadian \$ thousands)

4. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

5. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

6. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

Global Founders Fund 1.00BG

Notes to the Financial Statements

(in Canadian \$ thousands)

7. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	25.38	7.18	28.17	36.15	17.66

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Financial Statements of
THE CANADA LIFE ASSURANCE COMPANY
GLOBAL GROWTH EQUITY FUND 1.07TRP

December 31, 2024

Independent Auditor's Report

To the Contractholders of Global Growth Equity Fund 1.07TRP (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Global Growth Equity Fund 1.07TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Global Growth Equity Fund 1.07TRP (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Global Growth Equity Fund 1.07TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Global Growth Equity Fund 1.07TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Global Growth Equity Fund 1.07TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Global Growth Equity Fund 1.07TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Global Growth Equity Fund 1.07TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

Global Growth Equity Fund 1.07TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

Portfolio units are those units owned by the Asset Allocation Funds. Each Portfolio fund is represented by a separate category.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Global Growth Equity Fund 1.07TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

Global Growth Equity Fund 1.07TRP

Notes to the Financial Statements

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

Global Growth Equity Fund 1.07TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

Global Growth Equity Fund 1.07TRP

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	6.25	8.05	12.04	9.34	0.10

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
SUSTAINABLE GLOBAL BOND FUND 2.34JPM

December 31, 2024

Independent Auditor's Report

To the Contractholders of Sustainable Global Bond Fund 2.34JPM (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statement of financial position as at December 31, 2024, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the year then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024, and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Sustainable Global Bond Fund 2.34JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Sustainable Global Bond Fund 2.34JPM (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Sustainable Global Bond Fund 2.34JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Sustainable Global Bond Fund 2.34JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Sustainable Global Bond Fund 2.34JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Sustainable Global Bond Fund 2.34JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Sustainable Global Bond Fund 2.34JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

Sustainable Global Bond Fund 2.34JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Sustainable Global Bond Fund 2.34JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

Sustainable Global Bond Fund 2.34JPM

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

Sustainable Global Bond Fund 2.34JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

10. COMPARATIVE FINANCIAL STATEMENTS

The Company introduced the Fund during 2023. Accordingly, the comparative financial statements reflect activity for the period:

October 23, 2023 to December 31, 2023

Sustainable Global Bond Fund 2.34JPM

Supplemental Information (unaudited)

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	2.33	2.28	—	—	—
75/100 guarantee policy	2.50	—	—	—	—
PS 75/100 guarantee policy	1.95	—	—	—	—
PPS 75/100 guarantee policy	1.54	—	—	—	—
75/100 Constellation	2.04	—	—	—	—

Portfolio Turnover Rate (%) ⁽²⁾⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	36.91	—	—	—	—

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

(3) The Fund commenced on October 23, 2023 and as a result does not have comparative figures for the prior years.

Independent Auditor's Report

To the Contractholders of Sustainable Global Equity Fund 2.35JPM (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the year ended December 31, 2024 and the period ended December 31, 2023, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the year ended December 31, 2024 and the period ended December 31, 2023 in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Sustainable Global Equity Fund 2.35JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Sustainable Global Equity Fund 2.35JPM (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Sustainable Global Equity Fund 2.35JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Sustainable Global Equity Fund 2.35JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Sustainable Global Equity Fund 2.35JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Sustainable Global Equity Fund 2.35JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Sustainable Global Equity Fund 2.35JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

Sustainable Global Equity Fund 2.35JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Sustainable Global Equity Fund 2.35JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

Sustainable Global Equity Fund 2.35JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

Sustainable Global Equity Fund 2.35JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

10. COMPARATIVE FINANCIAL STATEMENTS

The Company introduced the Fund during 2023. Accordingly, the comparative financial statements reflect activity for the period:

October 23, 2023 to December 31, 2023

Sustainable Global Equity Fund 2.35JPM

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	3.05	2.99	—	—	—
75/100 guarantee policy	3.33	3.28	—	—	—

Portfolio Turnover Rate (%) ⁽²⁾⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	27.06	2.49	—	—	—

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

(3) The Fund commenced on October 23, 2023 and as a result does not have comparative figures for the prior years.

Independent Auditor's Report

To the Contractholders of Sustainable Emerging Markets Equity Fund 2.36JPM (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the year ended December 31, 2024 and the period ended December 31, 2023, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the year ended December 31, 2024 and the period ended December 31, 2023 in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Sustainable Emerging Markets Equity Fund 2.36JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Sustainable Emerging Markets Equity Fund 2.36JPM (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Sustainable Emerging Markets Equity Fund 2.36JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Sustainable Emerging Markets Equity Fund 2.36JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Sustainable Emerging Markets Equity Fund 2.36JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Sustainable Emerging Markets Equity Fund 2.36JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Sustainable Emerging Markets Equity Fund 2.36JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

Sustainable Emerging Markets Equity Fund 2.36JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Sustainable Emerging Markets Equity Fund 2.36JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

Sustainable Emerging Markets Equity Fund 2.36JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

Sustainable Emerging Markets Equity Fund 2.36JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

10. COMPARATIVE FINANCIAL STATEMENTS

The Company introduced the Fund during 2023. Accordingly, the comparative financial statements reflect activity for the period:

October 23, 2023 to December 31, 2023

Sustainable Emerging Markets Equity Fund 2.36JPM

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	3.39	3.33	—	—	—
75/100 guarantee policy	3.78	—	—	—	—
PS1 75/75 guarantee policy	3.06	—	—	—	—
PS 75/100 guarantee policy	2.67	—	—	—	—
75/75 Constellation	2.58	—	—	—	—
75/100 Constellation	2.92	—	—	—	—

Portfolio Turnover Rate (%) ⁽²⁾⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	142.74	13.82	—	—	—

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

(3) The Fund commenced on October 23, 2023 and as a result does not have comparative figures for the prior years.

Financial Statements of
THE CANADA LIFE ASSURANCE COMPANY
CONSERVATIVE ALLOCATION FUND S-626

December 31, 2024

Independent Auditor's Report

To the Contractholders of Conservative Allocation Fund S-626 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Conservative Allocation Fund S-626

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Conservative Allocation Fund S-626 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Conservative Allocation Fund S-626

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Conservative Allocation Fund S-626

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Conservative Allocation Fund S-626

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Conservative Allocation Fund S-626

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Conservative Allocation Fund S-626

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

Conservative Allocation Fund S-626

Notes to the Financial Statements

(in Canadian \$ thousands)

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Conservative Allocation Fund S-626

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Conservative Allocation Fund S-626

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Conservative Allocation Fund S-626

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Conservative Allocation Fund S-626

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Conservative Allocation Fund S-626

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	43.65	4.71	9.99	30.11	47.50

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
MODERATE ALLOCATION FUND S-627

December 31, 2024

Independent Auditor's Report

To the Contractholders of Moderate Allocation Fund S-627 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Moderate Allocation Fund S-627

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Moderate Allocation Fund S-627 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Moderate Allocation Fund S-627

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Moderate Allocation Fund S-627

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Moderate Allocation Fund S-627

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Moderate Allocation Fund S-627

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Moderate Allocation Fund S-627

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Moderate Allocation Fund S-627

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Moderate Allocation Fund S-627

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Moderate Allocation Fund S-627

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Moderate Allocation Fund S-627

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Moderate Allocation Fund S-627

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Moderate Allocation Fund S-627

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	38.10	7.41	7.59	32.14	50.98

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
BALANCED ALLOCATION FUND S-628

December 31, 2024

Independent Auditor's Report

To the Contractholders of Balanced Allocation Fund S-628 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Balanced Allocation Fund S-628

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Balanced Allocation Fund S-628 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Balanced Allocation Fund S-628

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Balanced Allocation Fund S-628

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Balanced Allocation Fund S-628

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Balanced Allocation Fund S-628

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Balanced Allocation Fund S-628

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Balanced Allocation Fund S-628

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Balanced Allocation Fund S-628

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Balanced Allocation Fund S-628

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Balanced Allocation Fund S-628

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Portfolio Turnover Rate	30.41	4.93	3.67	24.19	45.14

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

ADVANCED ALLOCATION FUND S-629

December 31, 2024

Independent Auditor's Report

To the Contractholders of Advanced Allocation Fund S-629 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Advanced Allocation Fund S-629

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Advanced Allocation Fund S-629 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Advanced Allocation Fund S-629

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Advanced Allocation Fund S-629

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Advanced Allocation Fund S-629

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Advanced Allocation Fund S-629

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Advanced Allocation Fund S-629

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Advanced Allocation Fund S-629

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Advanced Allocation Fund S-629

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Advanced Allocation Fund S-629

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Advanced Allocation Fund S-629

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Advanced Allocation Fund S-629

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	24.74	4.50	5.32	28.63	48.25

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Independent Auditor's Report

To the Contractholders of Aggressive Allocation Fund S-630 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Aggressive Allocation Fund S-630

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Aggressive Allocation Fund S-630 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Aggressive Allocation Fund S-630

Notes to the Financial Statements

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Aggressive Allocation Fund S-630

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Aggressive Allocation Fund S-630

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Aggressive Allocation Fund S-630

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Aggressive Allocation Fund S-630

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Aggressive Allocation Fund S-630

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Aggressive Allocation Fund S-630

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Aggressive Allocation Fund S-630

Notes to the Financial Statements

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Aggressive Allocation Fund S-630

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Aggressive Allocation Fund S-630

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Aggressive Allocation Fund S-630

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	31.57	5.66	6.70	32.76	32.07

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Financial Statements of
THE CANADA LIFE ASSURANCE COMPANY
INCOME FOCUS FUND SF631

December 31, 2024

Independent Auditor's Report

To the Contractholders of Income Focus Fund SF631 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Income Focus Fund SF631

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Income Focus Fund SF631 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Income Focus Fund SF631

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Income Focus Fund SF631

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Income Focus Fund SF631

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Income Focus Fund SF631

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Income Focus Fund SF631

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Income Focus Fund SF631

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Income Focus Fund SF631

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Income Focus Fund SF631

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Income Focus Fund SF631

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Income Focus Fund SF631

Portfolio Turnover Rate	46.97	37.66	7.83	10.99	15.15

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Independent Auditor's Report

To the Contractholders of Income Growth Fund SF632 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Income Growth Fund SF632

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Income Growth Fund SF632 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Income Growth Fund SF632

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Income Growth Fund SF632

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Income Growth Fund SF632

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Income Growth Fund SF632

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Income Growth Fund SF632

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Income Growth Fund SF632

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Income Growth Fund SF632

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Income Growth Fund SF632

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Income Growth Fund SF632

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Income Growth Fund SF632

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Income Growth Fund SF632

Supplemental Information *(unaudited)*

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	43.88	45.25	14.76	15.49	13.82

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Independent Auditor's Report

To the Contractholders of Income Growth Plus Fund SF633 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Income Growth Plus Fund SF633

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Income Growth Plus Fund SF633 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Income Growth Plus Fund SF633

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Income Growth Plus Fund SF633

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Income Growth Plus Fund SF633

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Income Growth Plus Fund SF633

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Income Growth Plus Fund SF633

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Income Growth Plus Fund SF633

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year..

Income Growth Plus Fund SF633

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Income Growth Plus Fund SF633

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Income Growth Plus Fund SF633

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Income Growth Plus Fund SF633

Supplemental Information (unaudited)

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	35.28	51.76	13.17	22.60	20.73

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
ESG U.S. EQUITY FUND 2.37JPM

December 31, 2024

Independent Auditor's Report

To the Contractholders of ESG U.S. Equity Fund 2.37JPM (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the year ended December 31, 2024 and the period ended December 31, 2023, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the year ended December 31, 2024 and the period ended December 31, 2023 in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

ESG U.S. Equity Fund 2.37JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The ESG U.S. Equity Fund 2.37JPM (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

ESG U.S. Equity Fund 2.37JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

ESG U.S. Equity Fund 2.37JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

ESG U.S. Equity Fund 2.37JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

ESG U.S. Equity Fund 2.37JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

ESG U.S. Equity Fund 2.37JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

ESG U.S. Equity Fund 2.37JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

ESG U.S. Equity Fund 2.37JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

ESG U.S. Equity Fund 2.37JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

ESG U.S. Equity Fund 2.37JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

ESG U.S. Equity Fund 2.37JPM

75/100 Constellation	2.24	—	—	—	—

Portfolio Turnover Rate (%) ⁽²⁾⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	40.96	1.19	—	—	—

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

(3) The Fund commenced on October 23, 2023 and as a result does not have comparative figures for the prior years.

THE CANADA LIFE ASSURANCE COMPANY
U.S. CARBON TRANSITION EQUITY FUND 2.38JPM

December 31, 2024

Independent Auditor's Report

To the Contractholders of U.S. Carbon Transition Equity Fund 2.38JPM (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statement of financial position as at December 31, 2024, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the year then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024, and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

U.S. Carbon Transition Equity Fund 2.38JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The U.S. Carbon Transition Equity Fund 2.38JPM (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

U.S. Carbon Transition Equity Fund 2.38JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

U.S. Carbon Transition Equity Fund 2.38JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

U.S. Carbon Transition Equity Fund 2.38JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

U.S. Carbon Transition Equity Fund 2.38JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

U.S. Carbon Transition Equity Fund 2.38JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

U.S. Carbon Transition Equity Fund 2.38JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

U.S. Carbon Transition Equity Fund 2.38JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

U.S. Carbon Transition Equity Fund 2.38JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

U.S. Carbon Transition Equity Fund 2.38JPM

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

U.S. Carbon Transition Equity Fund 2.38JPM

10. COMPARATIVE FINANCIAL STATEMENTS

The Company introduced the Fund during 2023. Accordingly, the comparative financial statements reflect activity for the period:

October 23, 2023 to December 31, 2023

U.S. Carbon Transition Equity Fund 2.38JPM

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	2.83	2.78	—	—	—
75/100 guarantee policy	3.11	—	—	—	—
PS1 75/75 guarantee policy	2.48	—	—	—	—

Portfolio Turnover Rate (%) ⁽²⁾⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	28.04	—	—	—	—

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

(3) The Fund commenced on October 23, 2023 and as a result does not have comparative figures for the prior years.

GLOBAL SMALL-MID CAP GROWTH FUND 2.39MI

December 31, 2024

Independent Auditor's Report

To the Contractholders of Global Small-Mid Cap Growth Fund 2.39MI (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the year ended December 31, 2024 and the period ended December 31, 2023, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the year ended December 31, 2024 and the period ended December 31, 2023 in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Global Small-Mid Cap Growth Fund 2.39MI

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Global Small-Mid Cap Growth Fund 2.39MI (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Global Small-Mid Cap Growth Fund 2.39MI

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Global Small-Mid Cap Growth Fund 2.39MI

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Global Small-Mid Cap Growth Fund 2.39MI

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Global Small-Mid Cap Growth Fund 2.39MI

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Global Small-Mid Cap Growth Fund 2.39MI

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

Global Small-Mid Cap Growth Fund 2.39MI

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Global Small-Mid Cap Growth Fund 2.39MI

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

Global Small-Mid Cap Growth Fund 2.39MI

Notes to the Financial Statements

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

Global Small-Mid Cap Growth Fund 2.39MI

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

10. COMPARATIVE FINANCIAL STATEMENTS

The Company introduced the Fund during 2023. Accordingly, the comparative financial statements reflect activity for the period:

October 23, 2023 to December 31, 2023

Global Small-Mid Cap Growth Fund 2.39MI

Supplemental Information (unaudited)

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾⁽⁴⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	3.01	2.94	—	—	—
75/100 guarantee policy	3.45	3.39	—	—	—
PS1 75/75 guarantee policy	2.66	2.60	—	—	—
PS1 75/100 guarantee policy	3.10	3.03	—	—	—
PS 75/75 guarantee policy	—	1.84	—	—	—
PPS 75/75 guarantee policy	1.56	—	—	—	—
PPS 75/100 guarantee policy	2.02	—	—	—	—

Unsubsidized Management Expense Ratio (%) ⁽²⁾⁽⁴⁾

For the years ended December 31	2024	2023	2022	2021	2020
PS1 75/75 guarantee policy	2.66	2.62	—	—	—
PS1 75/100 guarantee policy	3.10	3.05	—	—	—
PPS 75/75 guarantee policy	1.56	—	—	—	—
PPS 75/100 guarantee policy	2.02	—	—	—	—

Portfolio Turnover Rate (%) ⁽³⁾⁽⁴⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	31.73	2.12	—	—	—

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

(4) The Fund commenced on October 23, 2023 and as a result does not have comparative figures for the prior years.

December 31, 2024

Independent Auditor's Report

To the Contractholders of Canada Life Diversified Real Assets Fund 2.40CS (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the year ended December 31, 2024 and the period ended December 31, 2023, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the year ended December 31, 2024 and the period ended December 31, 2023 in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Canada Life Diversified Real Assets Fund 2.40CS

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Canada Life Diversified Real Assets Fund 2.40CS (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Canada Life Diversified Real Assets Fund 2.40CS

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Canada Life Diversified Real Assets Fund 2.40CS

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Canada Life Diversified Real Assets Fund 2.40CS

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Canada Life Diversified Real Assets Fund 2.40CS

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

Canada Life Diversified Real Assets Fund 2.40CS

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Canada Life Diversified Real Assets Fund 2.40CS

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

Canada Life Diversified Real Assets Fund 2.40CS

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

Portfolio Turnover Rate (%) ⁽²⁾⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	11.04	0.35	—	—	—

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

(3) The Fund commenced on October 23, 2023 and as a result does not have comparative figures for the prior years.

Financial Statements of
THE CANADA LIFE ASSURANCE COMPANY
HIGH INTEREST SAVINGS FUND 2.56CPS

December 31, 2024

Independent Auditor's Report

To the Contractholders of High Interest Savings Fund 2.56CPS (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statement of financial position as at December 31, 2024, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the period then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024, and its financial performance and its cash flows for the period then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

High Interest Savings Fund 2.56CPS

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The High Interest Savings Fund 2.56CPS (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company). The Fund commenced on May 10, 2024 and as a result does not have comparative figures for the prior years.

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

High Interest Savings Fund 2.56CPS

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

High Interest Savings Fund 2.56CPS

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

High Interest Savings Fund 2.56CPS

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

High Interest Savings Fund 2.56CPS

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

High Interest Savings Fund 2.56CPS

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

High Interest Savings Fund 2.56CPS

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

High Interest Savings Fund 2.56CPS

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

High Interest Savings Fund 2.56CPS

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

Portfolio Turnover Rate (%) ⁽³⁾⁽⁴⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	19.72	—	—	—	—

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The waiving of direct expenses to the segregated funds is done on a discretionary basis to maintain management expense ratios at competitive levels. There is no obligation on the Company to waive expenses and it may cease to do so at any time.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

(4) The Fund commenced on May 10, 2024 and as a result does not have comparative figures for the prior years.

Financial Statements of
THE CANADA LIFE ASSURANCE COMPANY
BALANCED INCOME FUND (CI) SF800

December 31, 2024

Independent Auditor's Report

To the Contractholders of Balanced Income Fund (CI) SF800 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Balanced Income Fund (CI) SF800

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Balanced Income Fund (CI) SF800 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Balanced Income Fund (CI) SF800

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Balanced Income Fund (CI) SF800

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Balanced Income Fund (CI) SF800

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Balanced Income Fund (CI) SF800

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Balanced Income Fund (CI) SF800

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Balanced Income Fund (CI) SF800

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Balanced Income Fund (CI) SF800

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year..

Balanced Income Fund (CI) SF800

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Balanced Income Fund (CI) SF800

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Balanced Income Fund (CI) SF800

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Balanced Income Fund (CI) SF800

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	2.84	2.82	2.88	2.93	2.93
75/100 guarantee policy	2.90	2.88	2.93	2.99	2.99
100/100 guarantee policy	3.05	3.03	3.08	3.14	3.14
PS1 75/75 guarantee policy	2.26	2.25	2.32	2.36	2.36
PS1 75/100 guarantee policy	2.32	2.30	2.36	2.41	2.41
PS1 100/100 guarantee policy	2.48	2.47	2.54	2.58	2.57

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	0.42	0.26	101.77	0.82	8.64

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
CORE BALANCED FUND SF801

December 31, 2024

Independent Auditor's Report

To the Contractholders of Core Balanced Fund SF801 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Core Balanced Fund SF801

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Core Balanced Fund SF801 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Core Balanced Fund SF801

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Core Balanced Fund SF801

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Core Balanced Fund SF801

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Core Balanced Fund SF801

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Core Balanced Fund SF801

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Core Balanced Fund SF801

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Core Balanced Fund SF801

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Core Balanced Fund SF801

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	7.95	10.90	7.92	6.78	20.39

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
CORE BALANCED GROWTH PLUS FUND SF802

December 31, 2024

Independent Auditor's Report

To the Contractholders of Core Balanced Growth Plus Fund SF802 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Core Balanced Growth Plus Fund SF802

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Core Balanced Growth Plus Fund SF802 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Core Balanced Growth Plus Fund SF802

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Core Balanced Growth Plus Fund SF802

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Core Balanced Growth Plus Fund SF802

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Core Balanced Growth Plus Fund SF802

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Core Balanced Growth Plus Fund SF802

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Core Balanced Growth Plus Fund SF802

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Core Balanced Growth Plus Fund SF802

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Core Balanced Growth Plus Fund SF802

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Core Balanced Growth Plus Fund SF802

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Core Balanced Growth Plus Fund SF802

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Core Balanced Growth Plus Fund SF802

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	2.89	2.87	2.87	2.86	2.86
75/100 guarantee policy	2.94	2.92	2.92	2.92	2.92

PPS 75/100 guarantee policy	1.20	—	—	1.21	—

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	5.50	9.02	8.73	6.90	9.89

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Financial Statements of
THE CANADA LIFE ASSURANCE COMPANY
CORE CONSERVATIVE GROWTH FUND SF803

December 31, 2024

Independent Auditor's Report

To the Contractholders of Core Conservative Growth Fund SF803 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Core Conservative Growth Fund SF803

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Core Conservative Growth Fund SF803 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Core Conservative Growth Fund SF803

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Core Conservative Growth Fund SF803

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Core Conservative Growth Fund SF803

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Core Conservative Growth Fund SF803

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Core Conservative Growth Fund SF803

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Core Conservative Growth Fund SF803

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Core Conservative Growth Fund SF803

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Core Conservative Growth Fund SF803

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	6.59	5.49	12.37	11.98	9.91

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Independent Auditor's Report

To the Contractholders of Core Moderate Fund SF804 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Core Moderate Fund SF804

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Core Moderate Fund SF804 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Core Moderate Fund SF804

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Core Moderate Fund SF804

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Core Moderate Fund SF804

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Core Moderate Fund SF804

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Core Moderate Fund SF804

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Core Moderate Fund SF804

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Core Moderate Fund SF804

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Core Moderate Fund SF804

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Core Moderate Fund SF804

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Core Moderate Fund SF804

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	11.30	14.34	17.99	8.75	21.12

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
CORE MODERATE GROWTH PLUS FUND SF805

December 31, 2024

Independent Auditor's Report

To the Contractholders of Core Moderate Growth Plus Fund SF805 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Core Moderate Growth Plus Fund SF805

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Core Moderate Growth Plus Fund SF805 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Core Moderate Growth Plus Fund SF805

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Core Moderate Growth Plus Fund SF805

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Core Moderate Growth Plus Fund SF805

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Core Moderate Growth Plus Fund SF805

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Core Moderate Growth Plus Fund SF805

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Core Moderate Growth Plus Fund SF805

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Core Moderate Growth Plus Fund SF805

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Core Moderate Growth Plus Fund SF805

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Core Moderate Growth Plus Fund SF805

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Core Moderate Growth Plus Fund SF805

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Core Moderate Growth Plus Fund SF805

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	10.32	10.53	14.83	5.91	14.57

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Independent Auditor's Report

To the Contractholders of Balanced Fund (Fidelity) SF806 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Balanced Fund (Fidelity) SF806

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Balanced Fund (Fidelity) SF806 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Balanced Fund (Fidelity) SF806

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Balanced Fund (Fidelity) SF806

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Balanced Fund (Fidelity) SF806

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Balanced Fund (Fidelity) SF806

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Balanced Fund (Fidelity) SF806

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Balanced Fund (Fidelity) SF806

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Balanced Fund (Fidelity) SF806

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Balanced Fund (Fidelity) SF806

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Balanced Fund (Fidelity) SF806

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Balanced Fund (Fidelity) SF806

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Balanced Fund (Fidelity) SF806

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	3.01	2.99	2.99	3.00	3.00
75/100 guarantee policy	3.07	3.04	3.05	3.05	3.05
100/100 guarantee policy	3.23	3.20	3.20	3.21	3.21
PS1 75/75 guarantee policy	2.43	2.41	2.42	2.42	2.42
PS1 75/100 guarantee policy	2.49	2.47	2.47	2.47	2.47
PS1 100/100 guarantee policy	2.65	2.63	2.63	2.64	2.64

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	0.21	0.66	0.21	0.69	9.38

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

December 31, 2024

Independent Auditor's Report

To the Contractholders of Moderate Growth Plus Fund (Fidelity) SF807 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Moderate Growth Plus Fund (Fidelity) SF807

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Moderate Growth Plus Fund (Fidelity) SF807 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Moderate Growth Plus Fund (Fidelity) SF807

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Moderate Growth Plus Fund (Fidelity) SF807

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Moderate Growth Plus Fund (Fidelity) SF807

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Moderate Growth Plus Fund (Fidelity) SF807

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Moderate Growth Plus Fund (Fidelity) SF807

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Moderate Growth Plus Fund (Fidelity) SF807

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Moderate Growth Plus Fund (Fidelity) SF807

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Moderate Growth Plus Fund (Fidelity) SF807

Notes to the Financial Statements

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Moderate Growth Plus Fund (Fidelity) SF807

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Moderate Growth Plus Fund (Fidelity) SF807

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Moderate Growth Plus Fund (Fidelity) SF807

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020

PS 75/75 guarantee policy	1.82	1.81	1.81	1.81	1.81

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	0.03	0.15	1.17	0.42	10.24

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
MODERATE INCOME FUND (FIDELITY) SF808

December 31, 2024

Independent Auditor's Report

To the Contractholders of Moderate Income Fund (Fidelity) SF808 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Moderate Income Fund (Fidelity) SF808

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Moderate Income Fund (Fidelity) SF808 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Moderate Income Fund (Fidelity) SF808

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Moderate Income Fund (Fidelity) SF808

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Moderate Income Fund (Fidelity) SF808

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Moderate Income Fund (Fidelity) SF808

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Moderate Income Fund (Fidelity) SF808

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Moderate Income Fund (Fidelity) SF808

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Moderate Income Fund (Fidelity) SF808

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Moderate Income Fund (Fidelity) SF808

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Moderate Income Fund (Fidelity) SF808

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Moderate Income Fund (Fidelity) SF808

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Moderate Income Fund (Fidelity) SF808

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	2.75	2.73	2.74	2.73	2.73
75/100 guarantee policy	2.81	2.78	2.79	2.79	2.78
100/100 guarantee policy	2.96	2.94	2.95	2.94	2.94
PS1 75/75 guarantee policy	2.17	2.15	2.15	2.15	2.15
PS1 75/100 guarantee policy	2.22	2.20	2.21	2.21	2.20
PS1 100/100 guarantee policy	2.39	2.37	2.38	2.37	2.37

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	0.30	0.29	0.37	0.94	10.89

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Financial Statements of
THE CANADA LIFE ASSURANCE COMPANY
BALANCED INCOME FUND (FRANKLIN
TEMPLETON) SF809

December 31, 2024

Independent Auditor's Report

To the Contractholders of Balanced Income Fund (Franklin Templeton) SF809 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Balanced Income Fund (Franklin Templeton) SF809

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Balanced Income Fund (Franklin Templeton) SF809 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Balanced Income Fund (Franklin Templeton) SF809

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Balanced Income Fund (Franklin Templeton) SF809

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Balanced Income Fund (Franklin Templeton) SF809

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Balanced Income Fund (Franklin Templeton) SF809

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Balanced Income Fund (Franklin Templeton) SF809

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Balanced Income Fund (Franklin Templeton) SF809

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Balanced Income Fund (Franklin Templeton) SF809

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Balanced Income Fund (Franklin Templeton) SF809

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Balanced Income Fund (Franklin Templeton) SF809

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Balanced Income Fund (Franklin Templeton) SF809

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Balanced Income Fund (Franklin Templeton) SF809

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	2.91	2.89	2.89	2.89	2.89
75/100 guarantee policy	2.97	2.95	2.95	2.95	2.94

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	0.73	0.02	0.69	0.52	5.54

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

December 31, 2024

Independent Auditor's Report

To the Contractholders of Moderate Growth Fund (Franklin Templeton) SF810 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Moderate Growth Fund (Franklin Templeton) SF810

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Moderate Growth Fund (Franklin Templeton) SF810 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Moderate Growth Fund (Franklin Templeton) SF810

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Moderate Growth Fund (Franklin Templeton) SF810

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Moderate Growth Fund (Franklin Templeton) SF810

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Moderate Growth Fund (Franklin Templeton) SF810

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Moderate Growth Fund (Franklin Templeton) SF810

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Moderate Growth Fund (Franklin Templeton) SF810

Notes to the Financial Statements

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Moderate Growth Fund (Franklin Templeton) SF810

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Moderate Growth Fund (Franklin Templeton) SF810

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Moderate Growth Fund (Franklin Templeton) SF810

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Moderate Growth Fund (Franklin Templeton) SF810

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	2.80	2.78	2.78	2.78	2.78
75/100 guarantee policy	2.86	2.84	2.84	2.84	2.84

PS1 75/100 guarantee policy	2.26	2.25	2.24	2.25	2.25
PS1 100/100 guarantee policy	—	2.41	2.41	2.41	2.41

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	0.08	0.12	0.05	0.07	3.88

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

December 31, 2024

Independent Auditor's Report

To the Contractholders of Moderate Income Fund (Franklin Templeton) SF811 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Moderate Income Fund (Franklin Templeton) SF811

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Moderate Income Fund (Franklin Templeton) SF811 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Moderate Income Fund (Franklin Templeton) SF811

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Moderate Income Fund (Franklin Templeton) SF811

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Moderate Income Fund (Franklin Templeton) SF811

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Moderate Income Fund (Franklin Templeton) SF811

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Moderate Income Fund (Franklin Templeton) SF811

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Moderate Income Fund (Franklin Templeton) SF811

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Moderate Income Fund (Franklin Templeton) SF811

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Moderate Income Fund (Franklin Templeton) SF811

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Moderate Income Fund (Franklin Templeton) SF811

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Moderate Income Fund (Franklin Templeton) SF811

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Moderate Income Fund (Franklin Templeton) SF811

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	2.69	2.67	2.68	2.68	2.68

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	0.02	0.01	1.42	0.45	7.01

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
BALANCED FUND (MACKENZIE) SF812

December 31, 2024

Independent Auditor's Report

To the Contractholders of Balanced Fund (Mackenzie) SF812 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Balanced Fund (Mackenzie) SF812

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Balanced Fund (Mackenzie) SF812 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Balanced Fund (Mackenzie) SF812

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Balanced Fund (Mackenzie) SF812

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Balanced Fund (Mackenzie) SF812

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Balanced Fund (Mackenzie) SF812

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Balanced Fund (Mackenzie) SF812

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Balanced Fund (Mackenzie) SF812

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Balanced Fund (Mackenzie) SF812

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Balanced Fund (Mackenzie) SF812

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Balanced Fund (Mackenzie) SF812

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Balanced Fund (Mackenzie) SF812

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Balanced Fund (Mackenzie) SF812

Supplemental Information (unaudited)

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	3.11	3.09	3.10	3.10	3.09
75/100 guarantee policy	3.17	3.14	3.15	3.15	3.15
100/100 guarantee policy	3.33	3.30	3.30	3.31	3.31
PS1 75/75 guarantee policy	2.54	2.52	2.52	2.51	2.50
PS1 75/100 guarantee policy	2.59	2.57	2.58	2.58	2.55
PS 75/75 guarantee policy	1.98	1.97	2.00	2.00	1.99
PS 75/100 guarantee policy	2.08	2.04	2.05	2.05	2.04

Unsubsidized Management Expense Ratio (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
PS1 75/75 guarantee policy	2.54	2.52	2.52	2.51	2.53
PS1 75/100 guarantee policy	2.59	2.57	2.58	2.58	2.58

Portfolio Turnover Rate (%) ⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	40.91	—	0.45	2.02	8.60

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Financial Statements of
THE CANADA LIFE ASSURANCE COMPANY
BALANCED INCOME FUND (MACKENZIE) SF813

December 31, 2024

Independent Auditor's Report

To the Contractholders of Balanced Income Fund (Mackenzie) SF813 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Balanced Income Fund (Mackenzie) SF813

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Balanced Income Fund (Mackenzie) SF813 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Balanced Income Fund (Mackenzie) SF813

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Balanced Income Fund (Mackenzie) SF813

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Balanced Income Fund (Mackenzie) SF813

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Balanced Income Fund (Mackenzie) SF813

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Balanced Income Fund (Mackenzie) SF813

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Balanced Income Fund (Mackenzie) SF813

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Balanced Income Fund (Mackenzie) SF813

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Balanced Income Fund (Mackenzie) SF813

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Balanced Income Fund (Mackenzie) SF813

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Balanced Income Fund (Mackenzie) SF813

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Balanced Income Fund (Mackenzie) SF813

Supplemental Information (unaudited)

Portfolio Turnover Rate (%) ⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	42.61	0.09	3.66	2.80	10.12

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

MODERATE GROWTH FUND (MACKENZIE) SF814

December 31, 2024

Independent Auditor's Report

To the Contractholders of Moderate Growth Fund (Mackenzie) SF814 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Moderate Growth Fund (Mackenzie) SF814

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Moderate Growth Fund (Mackenzie) SF814 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Moderate Growth Fund (Mackenzie) SF814

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Moderate Growth Fund (Mackenzie) SF814

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Moderate Growth Fund (Mackenzie) SF814

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Moderate Growth Fund (Mackenzie) SF814

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Moderate Growth Fund (Mackenzie) SF814

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Moderate Growth Fund (Mackenzie) SF814

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Moderate Growth Fund (Mackenzie) SF814

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Moderate Growth Fund (Mackenzie) SF814

Notes to the Financial Statements

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Moderate Growth Fund (Mackenzie) SF814

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Moderate Growth Fund (Mackenzie) SF814

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Portfolio Turnover Rate (%) ⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	54.73	0.12	0.02	2.26	7.98

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
MODERATE INCOME FUND (MACKENZIE) SF815

December 31, 2024

Independent Auditor's Report

To the Contractholders of Moderate Income Fund (Mackenzie) SF815 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Moderate Income Fund (Mackenzie) SF815

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Moderate Income Fund (Mackenzie) SF815 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Moderate Income Fund (Mackenzie) SF815

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Moderate Income Fund (Mackenzie) SF815

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Moderate Income Fund (Mackenzie) SF815

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Moderate Income Fund (Mackenzie) SF815

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Moderate Income Fund (Mackenzie) SF815

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Moderate Income Fund (Mackenzie) SF815

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Moderate Income Fund (Mackenzie) SF815

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Moderate Income Fund (Mackenzie) SF815

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Moderate Income Fund (Mackenzie) SF815

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Moderate Income Fund (Mackenzie) SF815

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Moderate Income Fund (Mackenzie) SF815

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

Portfolio Turnover Rate (%) ⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	61.26	0.04	3.70	0.54	9.31

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Financial Statements of
THE CANADA LIFE ASSURANCE COMPANY
SHORT TERM BOND FUND (PIM) SF816

December 31, 2024

Independent Auditor's Report

To the Contractholders of Short Term Bond Fund (PIM) SF816 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Short Term Bond Fund (PIM) SF816

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

Introduction

The objective of the Short Term Bond Fund (PIM) SF816 (the Fund) in managing risk is the creation and protection of contractholder value. Risk is inherent in the Fund's activities, but it is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. The process of risk management is critical to the Fund's continuing profitability. The Fund can be exposed to liquidity risk, market risk (which includes currency risk, interest rate risk and other price risk) and credit risk arising from the financial instruments it holds.

A. Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024, and groups the securities by asset type, geographic region and/or market segment. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, The Canada Life Assurance Company (Canada Life or the Company) maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations.

B. Liquidity Risk

Liquidity risk arises when a fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units by contractholders. The Fund retains sufficient cash and cash equivalent positions to maintain adequate liquidity to meet the obligation to fund daily cash redemptions of their redeemable units.

Some securities are illiquid due to legal restrictions on their resale, the nature of the investment, or simply a lack of interested buyers for a particular security or security type. Certain securities may become less liquid due to changes in market conditions, such as interest rate changes or market volatility, which could impair the ability of a fund to sell such securities quickly.

In accordance with the Fund's policy, the Company monitors the Fund's liquidity positions on a regular basis.

C. Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The classifications used on the Schedule of Investment Portfolio for the financial instruments are based on the country of issue.

The table below indicates the foreign currencies to which the Fund had significant exposure as at December 31, 2024 in Canadian dollar terms, including the underlying principal amount of forward currency contracts, if any. The table also illustrates the potential impact to the Fund's net assets attributable to contractholders, all other variables held constant, as a result of a 1% change in these currencies relative to the Canadian dollar. In practice, the actual results may differ from this sensitivity analysis and the difference could be significant.

2024

Currency	Investments	Cash, Short-term Deposits and Overdrafts	Total*	Impact on Net Assets Attributable to Contractholders
United States Dollar	\$ (2)	\$ —	\$ (2)	\$ —
Total	\$ (2)	\$ —	\$ (2)	\$ —
As Percent of Net Assets Attributable to Contractholders			—%	—%

*Includes both monetary and non-monetary instruments

Short Term Bond Fund (PIM) SF816

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

C. Currency Risk (continued)

2023					
Currency	Investments	Cash, Short-term Deposits and Overdrafts	Total*	Impact on Net Assets Attributable to Contractholders	
United States Dollar	\$ (3)	\$ 1	\$ (2)	\$	—
Other Currencies	—	(5)	(5)		—
Total	\$ (3)	\$ (4)	\$ (7)	\$	—
As Percent of Net Assets Attributable to Contractholders			—%		—%

*Includes both monetary and non-monetary instruments

D. Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund is exposed to the risk that the value of interest-bearing financial instruments will fluctuate due to changes in the prevailing levels of market interest rates. Due to the nature of short-term fixed income securities with a remaining term-to-maturity of less than one year, these investments are not generally exposed to a significant risk that their value will fluctuate in response to changes in the prevailing levels of market interest rates. The risk is professionally managed at the security and fund level by the Company.

The table below summarizes the Fund's exposure to interest rate risk by remaining term-to-maturity.

2024					
	1 year or less	Over 1 year to 5 years	Over 5 years to 10 years	Over 10 years	Total
Bonds	\$ 1,298	\$ 9,483	\$ 2,572	\$ 1,485	\$ 14,838

2023					
	1 year or less	Over 1 year to 5 years	Over 5 years to 10 years	Over 10 years	Total
Bonds	\$ 6,982	\$ 65,782	\$ 4,491	\$ 1,690	\$ 78,945

As at December 31, 2024, had prevailing interest rates increased or decreased by 1% assuming a parallel shift in the yield curve, with all other variables held constant, net assets attributable to contractholders would have decreased or increased, respectively, by approximately \$383 (\$2,192 at December 31, 2023) or approximately 2.5% (2.7% at December 31, 2023). The Fund's sensitivity to interest rate changes was estimated using the weighted average duration of the bond portfolio. In practice, the actual results may differ and the difference could be significant.

E. Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund's greatest concentration of credit risk is in debt securities, such as bonds. The fair value of debt instruments includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt instruments represents the maximum credit risk exposure as at December 31, 2024. The amount of credit risk to any one issuer may be determined from the information reported in the Schedule of Investment Portfolio. The Fund may invest in short-term fixed income securities issued or guaranteed primarily by the Government of Canada or any Canadian provincial government, obligations of Canadian chartered banks or trust companies, and commercial paper with approved credit ratings. The risk of default on these short-term fixed income securities is considered low. The Company monitors credit risk and credit ratings on a regular basis. All new counterparties to financial instruments are subject to an approval process.

Short Term Bond Fund (PIM) SF816

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

E. Credit Risk (continued)

There was no change in fair values of financial liabilities as a result of changes in credit risks during 2024 or 2023.

All transactions in listed securities are settled and paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker.

Credit ratings disclosed below are obtained from independent rating agencies including DBRS, Standard & Poor's, Moody's Investors Service and Fitch Ratings. The lowest rating provided by the agencies is used.

Debt securities by credit rating are as follows:

	2024		2023	
	Percent of Total Bonds (%)	Percent of Total Net Assets Attributable to Contractholders (%)	Percent of Total Bonds (%)	Percent of Total Net Assets Attributable to Contractholders (%)
AAA	3.0	2.9	7.7	7.5
AA	30.6	29.8	23.2	22.4
A	31.5	30.5	42.3	40.7
BBB	30.7	29.8	25.6	24.7
BB and lower	4.2	4.1	1.1	1.0
NR *	—	—	0.1	0.1
Total	100.0	97.1	100.0	96.4

*Bonds disclosed as NR are mortgage backed securities or privately placed bonds or bonds that have not been rated by a rating agency.

F. Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. The Fund Manager moderates this risk through careful selection of securities and other financial instruments within the parameters of the investment strategy. The maximum risk resulting from financial instruments is equivalent to their fair value.

For the Fund, the most significant exposure to other price risk arises from its investment in equity securities. As at December 31, 2024, had the prices on the respective stock exchanges for these securities increased or decreased by 1%, with all other variables held constant, assets would have increased (or decreased) by approximately \$0 (\$8 at December 31, 2023) or approximately 0.0% (0.0% at December 31, 2023) of total net assets attributable to contractholders. In practice, the actual results may differ and the difference could be significant.

Short Term Bond Fund (PIM) SF816

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

G. Fair Value Classification

The following table presents information about the Fund's assets and liabilities measured at fair value on a recurring basis and indicates the fair value hierarchy of the valuation techniques utilized by the Fund to determine such fair value:

		2024			
		Assets and Liabilities Measured at Fair Value			
		Level 1	Level 2	Level 3	Total
Assets measured at fair value					
Bonds	\$	—	\$ 14,838	\$ —	\$ 14,838
Stocks		7	—	—	7
Derivatives		1	17	—	18
Total assets measured at fair value	\$	8	\$ 14,855	\$ —	\$ 14,863
Liabilities measured at fair value					
Derivatives ⁽¹⁾	\$	—	\$ 40	\$ —	\$ 40
Net assets attributable to contractholders measured at fair value	\$	8	\$ 14,815	\$ —	\$ 14,823

⁽¹⁾ Excludes collateral pledged to counterparties of \$14.

		2023			
		Assets and Liabilities Measured at Fair Value			
		Level 1	Level 2	Level 3	Total
Assets measured at fair value					
Bonds	\$	—	\$ 78,945	\$ —	\$ 78,945
Stocks		781	—	—	781
Derivatives		7	35	—	42
Total assets measured at fair value	\$	788	\$ 78,980	\$ —	\$ 79,768
Liabilities measured at fair value					
Derivatives ⁽¹⁾	\$	2	\$ —	\$ —	\$ 2
Net assets attributable to contractholders measured at fair value	\$	786	\$ 78,980	\$ —	\$ 79,766

⁽¹⁾ Excludes collateral pledged to counterparties of \$76.

There were no significant transfers between Level 1 and Level 2 during 2024 or 2023.

Short Term Bond Fund (PIM) SF816

(in Canadian \$, except number of units outstanding)

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance. Portfolio units are allocated to each category as described in note 3 and are not included on this page.

Short Term Bond Fund (PIM) SF816

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Fund is offered by The Canada Life Assurance Company.

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Short Term Bond Fund (PIM) SF816

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Short Term Bond Fund (PIM) SF816

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in fair value measurements in the notes to the Schedule of Investment Portfolio.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Short Term Bond Fund (PIM) SF816

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Bonds and Stocks

Bonds and stocks are recorded at fair value determined with reference to closing quoted market prices, where the last traded price falls within the day's bid-ask spread, primarily provided by third party independent pricing sources. Fair values are determined on the basis of the closing price for a security on the recognized exchange on which it is principally traded at each reporting date. In circumstances where the last traded price is not within the bid-ask spread, the Company determines the point when the bid-ask spread that is most representative of fair value based on the specific facts and circumstances.

The fair value of unlisted securities is established using quotations determined by a major dealer in a particular security. Should the quoted value for a security, in the opinion of the Fund Manager, be inaccurate, unreliable, or not readily available, the value of the security is estimated using valuation techniques. Valuation techniques include the market approach (using recent arm's-length market transactions adjusted as necessary and reference to the current market value of another instrument that is substantially the same) and the income approach (discounted cash flow analysis and option pricing models making as much use of available and supportable market data as possible).

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Derivatives

Derivatives are classified and measured at fair value. Derivatives are valued using market transactions and other market evidence whenever possible, including market based inputs to models, broker or dealer quotations or alternative pricing sources with reasonable levels of transparency. When models are used, the selection of a particular model to value a derivative depends on the contractual terms of, and specific risks inherent in, the instrument, as well as the availability of pricing information in the market. The Company generally uses similar models to value similar instruments. Valuation models require a variety of inputs, including contractual terms, market prices and rates, yield curves, credit curves, measures volatility, prepayment rates and correlations of such inputs.

f) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

Short Term Bond Fund (PIM) SF816

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

g) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

Interest income on debt securities - included in the change in fair value of such investments and recorded on the accrual basis.

Dividend income - accrued as of the ex-dividend date and recorded on the accrual basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

Miscellaneous income (loss)

Miscellaneous income (loss) generally includes the changes in foreign exchange rates between trade and settlement dates, foreign exchange rates on bank balances, securities lending income, derivative income, and management fee rebates.

h) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Short Term Bond Fund (PIM) SF816

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

i) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

j) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

k) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

l) Income Allocation

Net gain (loss) on investments, which includes dividend income, interest income, realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the net asset value (NAV) per unit.

Short Term Bond Fund (PIM) SF816

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

m) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

n) Transaction Costs

Transaction costs, such as brokerage commissions, incurred in the purchase and sale of securities by the Fund are charged to expenses in the year.

o) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

Short Term Bond Fund (PIM) SF816

Notes to the Financial Statements

(in Canadian \$ thousands)

3. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,

Portfolio units are those units owned by the Asset Allocation Funds. Each Portfolio fund is represented by a separate category.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Short Term Bond Fund (PIM) SF816

Notes to the Financial Statements

(in Canadian \$ thousands)

4. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

5. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

6. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

7. DERIVATIVE FINANCIAL INSTRUMENTS

Derivative contracts, including forward currency, futures and equity swap contracts, are valued at the gain or loss that would arise as a result of closing the position at the reporting date. Options are recorded at fair value as at the reporting date. The Fund may use derivative contracts to hedge against losses caused by changes in securities prices, interest rates, exchange rates and/or other risks. The Fund may also use derivative contracts for non-hedging purposes in order to invest indirectly in financial markets or to gain exposure to other currencies, provided the use of such derivatives is consistent with the Fund's investment objectives and strategies. Foreign currency risk and exposure may be direct or indirect and can include all or a portion of the currency exposure of an existing investment or group of investments. Any such gain or loss on derivative contracts is recorded as part of net gain (loss) on investments.

As at the reporting date, the unrealized gain (loss) on derivative contracts is reflected on the Statement of Financial Position of the Fund.

The Fund manages derivative credit risk through collateral arrangements where required. The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. Guidelines are implemented by the Fund regarding the acceptability of types of collateral and the valuation parameters. The Fund Manager monitors the value of the collateral and requests additional collateral when needed.

Short Term Bond Fund (PIM) SF816

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Mackenzie Financial Corporation, which operates as Mackenzie Investments. All investment transactions with the corresponding underlying funds are at quoted market prices.

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	56.17	93.18	59.21	62.75	54.98

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

CORPORATE BOND FUND (PIM) SF817

December 31, 2024

Independent Auditor's Report

To the Contractholders of Corporate Bond Fund (PIM) SF817 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Corporate Bond Fund (PIM) SF817

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

Introduction

The objective of the Corporate Bond Fund (PIM) SF817 (the Fund) in managing risk is the creation and protection of contractholder value. Risk is inherent in the Fund's activities, but it is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. The process of risk management is critical to the Fund's continuing profitability. The Fund can be exposed to liquidity risk, market risk (which includes currency risk, interest rate risk and other price risk) and credit risk arising from the financial instruments it holds.

A. Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024, and groups the securities by asset type, geographic region and/or market segment. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, The Canada Life Assurance Company (Canada Life or the Company) maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations.

B. Liquidity Risk

Liquidity risk arises when a fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units by contractholders. The Fund retains sufficient cash and cash equivalent positions to maintain adequate liquidity to meet the obligation to fund daily cash redemptions of their redeemable units.

Some securities are illiquid due to legal restrictions on their resale, the nature of the investment, or simply a lack of interested buyers for a particular security or security type. Certain securities may become less liquid due to changes in market conditions, such as interest rate changes or market volatility, which could impair the ability of a fund to sell such securities quickly.

In accordance with the Fund's policy, the Company monitors the Fund's liquidity positions on a regular basis.

C. Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The classifications used on the Schedule of Investment Portfolio for the financial instruments are based on the country of issue.

Corporate Bond Fund (PIM) SF817

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

C. Currency Risk (continued)

The table below indicates the foreign currencies to which the Fund had significant exposure as at December 31, 2024 in Canadian dollar terms, including the underlying principal amount of forward currency contracts, if any. The table also illustrates the potential impact to the Fund's net assets attributable to contractholders, all other variables held constant, as a result of a 1% change in these currencies relative to the Canadian dollar. In practice, the actual results may differ from this sensitivity analysis and the difference could be significant.

2024					
Currency	Investments	Cash, Short-term Deposits and Overdrafts	Total*	Impact on Net Assets Attributable to Contractholders	
United States Dollar	\$ 51	\$ —	\$ 51	\$	1
Other Currencies	—	4	4		—
Total	\$ 51	\$ 4	\$ 55	\$	1
As Percent of Net Assets Attributable to Contractholders			0.1%		—%

*Includes both monetary and non-monetary instruments

2023					
Currency	Investments	Cash, Short-term Deposits and Overdrafts	Total*	Impact on Net Assets Attributable to Contractholders	
United States Dollar	\$ 12	\$ 51	\$ 63	\$	1
Other Currencies	—	(10)	(10)		—
Total	\$ 12	\$ 41	\$ 53	\$	1
As Percent of Net Assets Attributable to Contractholders			—%		—%

*Includes both monetary and non-monetary instruments

D. Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund is exposed to the risk that the value of interest-bearing financial instruments will fluctuate due to changes in the prevailing levels of market interest rates. Due to the nature of short-term fixed income securities with a remaining term-to-maturity of less than one year, these investments are not generally exposed to a significant risk that their value will fluctuate in response to changes in the prevailing levels of market interest rates. The risk is professionally managed at the security and fund level by the Company.

The table below summarizes the Fund's exposure to interest rate risk by remaining term-to-maturity.

2024					
	1 year or less	Over 1 year to 5 years	Over 5 years to 10 years	Over 10 years	Total
Bonds	\$ 5,964	\$ 16,562	\$ 25,023	\$ 21,105	\$ 68,654

2023					
	1 year or less	Over 1 year to 5 years	Over 5 years to 10 years	Over 10 years	Total
Bonds	\$ 718	\$ 65,430	\$ 50,178	\$ 42,682	\$ 159,008

Corporate Bond Fund (PIM) SF817

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

D. Interest Rate Risk (continued)

As at December 31, 2024, had prevailing interest rates increased or decreased by 1% assuming a parallel shift in the yield curve, with all other variables held constant, net assets attributable to contractholders would have decreased or increased, respectively, by approximately \$3,747 (\$9,189 at December 31, 2023) or approximately 5.2% (5.6% at December 31, 2023). The Fund's sensitivity to interest rate changes was estimated using the weighted average duration of the bond portfolio. In practice, the actual results may differ and the difference could be significant.

E. Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund's greatest concentration of credit risk is in debt securities, such as bonds. The fair value of debt instruments includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt instruments represents the maximum credit risk exposure as at December 31, 2024. The amount of credit risk to any one issuer may be determined from the information reported in the Schedule of Investment Portfolio. The Fund may invest in short-term fixed income securities issued or guaranteed primarily by the Government of Canada or any Canadian provincial government, obligations of Canadian chartered banks or trust companies, and commercial paper with approved credit ratings. The risk of default on these short-term fixed income securities is considered low. The Company monitors credit risk and credit ratings on a regular basis. All new counterparties to financial instruments are subject to an approval process.

There was no change in fair values of financial liabilities as a result of changes in credit risks during 2024 or 2023.

All transactions in listed securities are settled and paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker.

Credit ratings disclosed below are obtained from independent rating agencies including DBRS, Standard & Poor's, Moody's Investors Service and Fitch Ratings. The lowest rating provided by the agencies is used.

Debt securities by credit rating are as follows:

	2024		2023	
	Percent of Total Bonds (%)	Percent of Total Net Assets Attributable to Contractholders (%)	Percent of Total Bonds (%)	Percent of Total Net Assets Attributable to Contractholders (%)
AA	0.6	0.5	2.1	2.0
A	35.4	33.9	40.1	38.7
BBB	50.0	47.7	49.1	47.4
BB and lower	13.6	13.0	8.5	8.2
NR *	0.4	0.3	0.2	0.2
Total	100.0	95.4	100.0	96.5

*Bonds disclosed as NR are mortgage backed securities or privately placed bonds or bonds that have not been rated by a rating agency.

Corporate Bond Fund (PIM) SF817

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

F. Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. The Fund Manager moderates this risk through careful selection of securities and other financial instruments within the parameters of the investment strategy. The maximum risk resulting from financial instruments is equivalent to their fair value.

For the Fund, the most significant exposure to other price risk arises from its investment in equity securities. As at December 31, 2024, had the prices on the respective stock exchanges for these securities increased or decreased by 1%, with all other variables held constant, assets would have increased (or decreased) by approximately \$1 (\$30 at December 31, 2023) or approximately 0.0% (0.0% at December 31, 2023) of total net assets attributable to contractholders. In practice, the actual results may differ and the difference could be significant.

G. Fair Value Classification

The following table presents information about the Fund's assets and liabilities measured at fair value on a recurring basis and indicates the fair value hierarchy of the valuation techniques utilized by the Fund to determine such fair value:

2024				
Assets and Liabilities Measured at Fair Value				
	Level 1	Level 2	Level 3	Total
Assets measured at fair value				
Bonds	\$ —	\$ 68,612	\$ 42	\$ 68,654
Stocks	141	—	—	141
Derivatives	10	82	—	92
Total assets measured at fair value	\$ 151	\$ 68,694	\$ 42	\$ 68,887
Liabilities measured at fair value				
Derivatives ⁽¹⁾	\$ —	\$ 232	\$ —	\$ 232
Net assets attributable to contractholders measured at fair value	\$ 151	\$ 68,462	\$ 42	\$ 68,655

⁽¹⁾ Excludes collateral pledged to counterparties of \$158.

2023				
Assets and Liabilities Measured at Fair Value				
	Level 1	Level 2	Level 3	Total
Assets measured at fair value				
Bonds	\$ —	\$ 158,968	\$ 40	\$ 159,008
Stocks	3,018	—	—	3,018
Derivatives	16	211	—	227
Total assets measured at fair value	\$ 3,034	\$ 159,179	\$ 40	\$ 162,253
Liabilities measured at fair value				
Derivatives ⁽¹⁾	\$ —	\$ 118	\$ —	\$ 118
Net assets attributable to contractholders measured at fair value	\$ 3,034	\$ 159,061	\$ 40	\$ 162,135

⁽¹⁾ Excludes collateral pledged to counterparties of \$86.

There were no significant transfers between Level 1 and Level 2 during 2024 or 2023.

Corporate Bond Fund (PIM) SF817

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Fund is offered by The Canada Life Assurance Company.

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Corporate Bond Fund (PIM) SF817

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Corporate Bond Fund (PIM) SF817

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in fair value measurements in the notes to the Schedule of Investment Portfolio.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Corporate Bond Fund (PIM) SF817

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Bonds and Stocks

Bonds and stocks are recorded at fair value determined with reference to closing quoted market prices, where the last traded price falls within the day's bid-ask spread, primarily provided by third party independent pricing sources. Fair values are determined on the basis of the closing price for a security on the recognized exchange on which it is principally traded at each reporting date. In circumstances where the last traded price is not within the bid-ask spread, the Company determines the point when the bid-ask spread that is most representative of fair value based on the specific facts and circumstances.

The fair value of unlisted securities is established using quotations determined by a major dealer in a particular security. Should the quoted value for a security, in the opinion of the Fund Manager, be inaccurate, unreliable, or not readily available, the value of the security is estimated using valuation techniques. Valuation techniques include the market approach (using recent arm's-length market transactions adjusted as necessary and reference to the current market value of another instrument that is substantially the same) and the income approach (discounted cash flow analysis and option pricing models making as much use of available and supportable market data as possible).

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Derivatives

Derivatives are classified and measured at fair value. Derivatives are valued using market transactions and other market evidence whenever possible, including market based inputs to models, broker or dealer quotations or alternative pricing sources with reasonable levels of transparency. When models are used, the selection of a particular model to value a derivative depends on the contractual terms of, and specific risks inherent in, the instrument, as well as the availability of pricing information in the market. The Company generally uses similar models to value similar instruments. Valuation models require a variety of inputs, including contractual terms, market prices and rates, yield curves, credit curves, measures volatility, prepayment rates and correlations of such inputs.

f) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

Corporate Bond Fund (PIM) SF817

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

g) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

Interest income on debt securities - included in the change in fair value of such investments and recorded on the accrual basis.

Dividend income - accrued as of the ex-dividend date and recorded on the accrual basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

Miscellaneous income (loss)

Miscellaneous income (loss) generally includes the changes in foreign exchange rates between trade and settlement dates, foreign exchange rates on bank balances, securities lending income, derivative income, and management fee rebates.

h) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Corporate Bond Fund (PIM) SF817

Notes to the Financial Statements

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

i) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

j) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

k) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

l) Income Allocation

Net gain (loss) on investments, which includes dividend income, interest income, realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the net asset value (NAV) per unit.

Corporate Bond Fund (PIM) SF817

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

m) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

n) Transaction Costs

Transaction costs, such as brokerage commissions, incurred in the purchase and sale of securities by the Fund are charged to expenses in the year.

o) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

Corporate Bond Fund (PIM) SF817

Notes to the Financial Statements

(in Canadian \$ thousands)

3. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

Portfolio units are those units owned by the Asset Allocation Funds. Each Portfolio fund is represented by a separate category.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

4. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

Corporate Bond Fund (PIM) SF817

Notes to the Financial Statements

(in Canadian \$ thousands)

5. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

6. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

The NAV per unit for group contractholders has not been shown because it will vary for each sub-class within the group contractholder class based on negotiated expense levels and other factors.

7. DERIVATIVE FINANCIAL INSTRUMENTS

Derivative contracts, including forward currency, futures and equity swap contracts, are valued at the gain or loss that would arise as a result of closing the position at the reporting date. Options are recorded at fair value as at the reporting date. The Fund may use derivative contracts to hedge against losses caused by changes in securities prices, interest rates, exchange rates and/or other risks. The Fund may also use derivative contracts for non-hedging purposes in order to invest indirectly in financial markets or to gain exposure to other currencies, provided the use of such derivatives is consistent with the Fund's investment objectives and strategies. Foreign currency risk and exposure may be direct or indirect and can include all or a portion of the currency exposure of an existing investment or group of investments. Any such gain or loss on derivative contracts is recorded as part of net gain (loss) on investments.

As at the reporting date, the unrealized gain (loss) on derivative contracts is reflected on the Statement of Financial Position of the Fund.

The Fund manages derivative credit risk through collateral arrangements where required. The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. Guidelines are implemented by the Fund regarding the acceptability of types of collateral and the valuation parameters. The Fund Manager monitors the value of the collateral and requests additional collateral when needed.

Corporate Bond Fund (PIM) SF817

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Mackenzie Financial Corporation, which operates as Mackenzie Investments. All investment transactions with the corresponding underlying funds are at quoted market prices.

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	46.37	47.74	54.49	60.92	34.61

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

LONG TERM BOND FUND (PIM) SF818

December 31, 2024

Independent Auditor's Report

To the Contractholders of Long Term Bond Fund (PIM) SF818 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Long Term Bond Fund (PIM) SF818

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

Introduction

The objective of the Long Term Bond Fund (PIM) SF818 (the Fund) in managing risk is the creation and protection of contractholder value. Risk is inherent in the Fund's activities, but it is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. The process of risk management is critical to the Fund's continuing profitability. The Fund can be exposed to liquidity risk, market risk (which includes currency risk, interest rate risk and other price risk) and credit risk arising from the financial instruments it holds.

A. Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024, and groups the securities by asset type, geographic region and/or market segment. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, The Canada Life Assurance Company (Canada Life or the Company) maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations.

B. Liquidity Risk

Liquidity risk arises when a fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units by contractholders. The Fund retains sufficient cash and cash equivalent positions to maintain adequate liquidity to meet the obligation to fund daily cash redemptions of their redeemable units.

Some securities are illiquid due to legal restrictions on their resale, the nature of the investment, or simply a lack of interested buyers for a particular security or security type. Certain securities may become less liquid due to changes in market conditions, such as interest rate changes or market volatility, which could impair the ability of a fund to sell such securities quickly.

In accordance with the Fund's policy, the Company monitors the Fund's liquidity positions on a regular basis.

C. Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund is exposed to the risk that the value of interest-bearing financial instruments will fluctuate due to changes in the prevailing levels of market interest rates. Due to the nature of short-term fixed income securities with a remaining term-to-maturity of less than one year, these investments are not generally exposed to a significant risk that their value will fluctuate in response to changes in the prevailing levels of market interest rates. The risk is professionally managed at the security and fund level by the Company.

The table below summarizes the Fund's exposure to interest rate risk by remaining term-to-maturity.

2024					
	1 year or less	Over 1 year to 5 years	Over 5 years to 10 years	Over 10 years	Total
Bonds	\$ —	\$ —	\$ 195	\$ 23,720	\$ 23,915

2023					
	1 year or less	Over 1 year to 5 years	Over 5 years to 10 years	Over 10 years	Total
Bonds	\$ —	\$ —	\$ 324	\$ 36,818	\$ 37,142

Long Term Bond Fund (PIM) SF818

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

C. Interest Rate Risk (continued)

As at December 31, 2024, had prevailing interest rates increased or decreased by 1% assuming a parallel shift in the yield curve, with all other variables held constant, net assets attributable to contractholders would have decreased or increased, respectively, by approximately \$3,554 (\$5,570 at December 31, 2023) or approximately 14.5% (14.9% at December 31, 2023). The Fund's sensitivity to interest rate changes was estimated using the weighted average duration of the bond portfolio. In practice, the actual results may differ and the difference could be significant.

D. Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund's greatest concentration of credit risk is in debt securities, such as bonds. The fair value of debt instruments includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt instruments represents the maximum credit risk exposure as at December 31, 2024. The amount of credit risk to any one issuer may be determined from the information reported in the Schedule of Investment Portfolio. The Fund may invest in short-term fixed income securities issued or guaranteed primarily by the Government of Canada or any Canadian provincial government, obligations of Canadian chartered banks or trust companies, and commercial paper with approved credit ratings. The risk of default on these short-term fixed income securities is considered low. The Company monitors credit risk and credit ratings on a regular basis. All new counterparties to financial instruments are subject to an approval process.

There was no change in fair values of financial liabilities as a result of changes in credit risks during 2024 or 2023.

All transactions in listed securities are settled and paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker.

Credit ratings disclosed below are obtained from independent rating agencies including DBRS, Standard & Poor's, Moody's Investors Service and Fitch Ratings. The lowest rating provided by the agencies is used.

Debt securities by credit rating are as follows:

	2024		2023	
	Percent of Total Bonds (%)	Percent of Total Net Assets Attributable to Contractholders (%)	Percent of Total Bonds (%)	Percent of Total Net Assets Attributable to Contractholders (%)
AAA	2.0	1.9	1.4	1.4
AA	67.7	66.2	45.7	45.5
A	22.2	21.7	43.4	43.2
BBB	8.1	7.9	9.5	9.4
Total	100.0	97.7	100.0	99.5

E. Fair Value Classification

The following table presents information about the Fund's assets measured at fair value on a recurring basis and indicates the fair value hierarchy of the valuation techniques utilized by the Fund to determine such fair value:

<u>Assets measured at fair value</u>	2024			
	Assets Measured at Fair Value			
	Level 1	Level 2	Level 3	Total
Bonds	\$ —	\$ 23,915	\$ —	\$ 23,915
Total assets measured at fair value	\$ —	\$ 23,915	\$ —	\$ 23,915

<u>Assets measured at fair value</u>	2023			
	Assets Measured at Fair Value			
	Level 1	Level 2	Level 3	Total
Bonds	\$ —	\$ 37,142	\$ —	\$ 37,142
Total assets measured at fair value	\$ —	\$ 37,142	\$ —	\$ 37,142

There were no significant transfers between Level 1 and Level 2 during 2024 or 2023.

Long Term Bond Fund (PIM) SF818

(in Canadian \$, except number of units outstanding)

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance. Portfolio units are allocated to each category as described in note 3 and are not included on this page.

Long Term Bond Fund (PIM) SF818

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Fund is offered by The Canada Life Assurance Company.

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Long Term Bond Fund (PIM) SF818

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Long Term Bond Fund (PIM) SF818

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in fair value measurements in the notes to the Schedule of Investment Portfolio.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Long Term Bond Fund (PIM) SF818

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Bonds

Bonds are recorded at fair value determined with reference to closing quoted market prices, where the last traded price falls within the day's bid-ask spread, primarily provided by third party independent pricing sources. Fair values are determined on the basis of the closing price for a security on the recognized exchange on which it is principally traded at each reporting date. In circumstances where the last traded price is not within the bid-ask spread, the Company determines the point when the bid-ask spread that is most representative of fair value based on the specific facts and circumstances.

The fair value of unlisted securities is established using quotations determined by a major dealer in a particular security. Should the quoted value for a security, in the opinion of the Fund Manager, be inaccurate, unreliable, or not readily available, the value of the security is estimated using valuation techniques. Valuation techniques include the market approach (using recent arm's-length market transactions adjusted as necessary and reference to the current market value of another instrument that is substantially the same) and the income approach (discounted cash flow analysis and option pricing models making as much use of available and supportable market data as possible).

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

Interest income on debt securities - included in the change in fair value of such investments and recorded on the accrual basis.

Long Term Bond Fund (PIM) SF818

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

Miscellaneous income (loss)

Miscellaneous income (loss) generally includes the changes in foreign exchange rates between trade and settlement dates, foreign exchange rates on bank balances, securities lending income, derivative income, and management fee rebates.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

Long Term Bond Fund (PIM) SF818

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

k) Income Allocation

Net gain (loss) on investments, which includes interest income, realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the net asset value (NAV) per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Transaction Costs

Transaction costs, such as brokerage commissions, incurred in the purchase and sale of securities by the Fund are charged to expenses in the year.

n) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

Long Term Bond Fund (PIM) SF818

Notes to the Financial Statements

(in Canadian \$ thousands)

3. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

Portfolio units are those units owned by the Asset Allocation Funds. Each Portfolio fund is represented by a separate category.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Long Term Bond Fund (PIM) SF818

Notes to the Financial Statements

(in Canadian \$ thousands)

4. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

5. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

6. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Long Term Bond Fund (PIM) SF818

Notes to the Financial Statements

7. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by the Company. All investment transactions with the corresponding underlying funds are at quoted market prices.

Long Term Bond Fund (PIM) SF818

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	2.21	2.18	2.17	2.17	2.14
75/100 guarantee policy	2.38	2.35	2.34	2.35	2.30
100/100 guarantee policy	2.55	2.52	2.51	2.51	2.47
PS1 75/75 guarantee policy	1.63	1.61	1.61	1.62	1.58
PS1 75/100 guarantee policy	1.80	1.78	1.77	1.77	1.74
PS1 100/100 guarantee policy	—	—	—	—	1.92

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	54.78	55.07	44.69	56.32	40.39

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Financial Statements of
THE CANADA LIFE ASSURANCE COMPANY
NORTH AMERICAN HIGH YIELD BOND FUND (MF)
SF819

December 31, 2024

Independent Auditor's Report

To the Contractholders of North American High Yield Bond Fund (MF) SF819 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

North American High Yield Bond Fund (MF) SF819

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The North American High Yield Bond Fund (MF) SF819 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

North American High Yield Bond Fund (MF) SF819

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

North American High Yield Bond Fund (MF) SF819

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

North American High Yield Bond Fund (MF) SF819

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

North American High Yield Bond Fund (MF) SF819

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

North American High Yield Bond Fund (MF) SF819

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in underlying mutual funds.

As the Fund's assets are invested in underlying investment funds, the Fund indirectly pays management fees and operating expenses of the underlying funds. All such charges are included in the management expense ratio of the segregated funds.

Distributions of income from the underlying investment funds are shown as net gain (loss) on investments on the Statement of Comprehensive Income.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Investments in unconsolidated structured entities

The Company has determined that the Fund meets the definition of an investment entity and as such, accounts for its holdings in unlisted open-ended investment funds at FVTPL. The Company has concluded that the underlying funds in which the Fund invests, but do not consolidate, meet the definition of structured entities because: (i) the voting rights in the underlying funds are not dominant rights in deciding who controls them; (ii) each underlying fund's activities are restricted by its prospectus; and (iii) the underlying funds have narrow and well-defined objectives to provide investment opportunities to investors.

North American High Yield Bond Fund (MF) SF819

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

North American High Yield Bond Fund (MF) SF819

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

North American High Yield Bond Fund (MF) SF819

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Mackenzie Financial Corporation, which operates as Mackenzie Investments. All investment transactions with the corresponding underlying funds are at quoted market prices.

North American High Yield Bond Fund (MF) SF819

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, the Fund Manager maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer.

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 1 classification.

North American High Yield Bond Fund (MF) SF819

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	13.50	14.41	17.54	14.99	17.87

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

REAL RETURN BOND FUND (PIM) SF820

December 31, 2024

Independent Auditor's Report

To the Contractholders of Real Return Bond Fund (PIM) SF820 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Real Return Bond Fund (PIM) SF820

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

Introduction

The objective of the Real Return Bond Fund (PIM) SF820 (the Fund) in managing risk is the creation and protection of contractholder value. Risk is inherent in the Fund's activities, but it is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. The process of risk management is critical to the Fund's continuing profitability. The Fund can be exposed to liquidity risk, market risk (which includes currency risk, interest rate risk and other price risk) and credit risk arising from the financial instruments it holds.

A. Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024, and groups the securities by asset type, geographic region and/or market segment. The following sections describe the significant risks that are relevant to the Fund.

To assist with managing risk, The Canada Life Assurance Company (Canada Life or the Company) maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations.

B. Liquidity Risk

Liquidity risk arises when a fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units by contractholders. The Fund retains sufficient cash and cash equivalent positions to maintain adequate liquidity to meet the obligation to fund daily cash redemptions of their redeemable units.

Some securities are illiquid due to legal restrictions on their resale, the nature of the investment, or simply a lack of interested buyers for a particular security or security type. Certain securities may become less liquid due to changes in market conditions, such as interest rate changes or market volatility, which could impair the ability of a fund to sell such securities quickly.

In accordance with the Fund's policy, the Company monitors the Fund's liquidity positions on a regular basis.

C. Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund is exposed to the risk that the value of interest-bearing financial instruments will fluctuate due to changes in the prevailing levels of market interest rates. Due to the nature of short-term fixed income securities with a remaining term-to-maturity of less than one year, these investments are not generally exposed to a significant risk that their value will fluctuate in response to changes in the prevailing levels of market interest rates. The risk is professionally managed at the security and fund level by the Company.

The table below summarizes the Fund's exposure to interest rate risk by remaining term-to-maturity.

2024									
	1 year or less		Over 1 year to 5 years		Over 5 years to 10 years		Over 10 years		Total
Bonds	\$	—	\$	7,284	\$	10,061	\$	39,581	\$ 56,926

2023									
	1 year or less		Over 1 year to 5 years		Over 5 years to 10 years		Over 10 years		Total
Bonds	\$	—	\$	8,888	\$	11,761	\$	48,274	\$ 68,923

Real Return Bond Fund (PIM) SF820

Notes to the Schedule of Investment Portfolio

(in Canadian \$ thousands)

C. Interest Rate Risk (continued)

As at December 31, 2024, had prevailing interest rates increased or decreased by 1% assuming a parallel shift in the yield curve, with all other variables held constant, net assets attributable to contractholders would have decreased or increased, respectively, by approximately \$3,604 (\$4,673 at December 31, 2023) or approximately 6.2% (6.8% at December 31, 2023). The Fund's sensitivity to interest rate changes was estimated using the weighted average duration of the bond portfolio. In practice, the actual results may differ and the difference could be significant.

D. Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund's greatest concentration of credit risk is in debt securities, such as bonds. The fair value of debt instruments includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt instruments represents the maximum credit risk exposure as at December 31, 2024. The amount of credit risk to any one issuer may be determined from the information reported in the Schedule of Investment Portfolio. The Fund may invest in short-term fixed income securities issued or guaranteed primarily by the Government of Canada or any Canadian provincial government, obligations of Canadian chartered banks or trust companies, and commercial paper with approved credit ratings. The risk of default on these short-term fixed income securities is considered low. The Company monitors credit risk and credit ratings on a regular basis. All new counterparties to financial instruments are subject to an approval process.

There was no change in fair values of financial liabilities as a result of changes in credit risks during 2024 or 2023.

All transactions in listed securities are settled and paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker.

Credit ratings disclosed below are obtained from independent rating agencies including DBRS, Standard & Poor's, Moody's Investors Service and Fitch Ratings. The lowest rating provided by the agencies is used.

Debt securities by credit rating are as follows:

	2024		2023	
	Percent of Total Bonds (%)	Percent of Total Net Assets Attributable to Contractholders (%)	Percent of Total Bonds (%)	Percent of Total Net Assets Attributable to Contractholders (%)
AA	100.0	98.7	93.9	93.6
A	—	—	6.1	6.1
Total	100.0	98.7	100.0	99.7

Real Return Bond Fund (PIM) SF820

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Fund is offered by The Canada Life Assurance Company.

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Real Return Bond Fund (PIM) SF820

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Real Return Bond Fund (PIM) SF820

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in fair value measurements in the notes to the Schedule of Investment Portfolio.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Real Return Bond Fund (PIM) SF820

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Bonds

Bonds are recorded at fair value determined with reference to closing quoted market prices, where the last traded price falls within the day's bid-ask spread, primarily provided by third party independent pricing sources. Fair values are determined on the basis of the closing price for a security on the recognized exchange on which it is principally traded at each reporting date. In circumstances where the last traded price is not within the bid-ask spread, the Company determines the point when the bid-ask spread that is most representative of fair value based on the specific facts and circumstances.

The fair value of unlisted securities is established using quotations determined by a major dealer in a particular security. Should the quoted value for a security, in the opinion of the Fund Manager, be inaccurate, unreliable, or not readily available, the value of the security is estimated using valuation techniques. Valuation techniques include the market approach (using recent arm's-length market transactions adjusted as necessary and reference to the current market value of another instrument that is substantially the same) and the income approach (discounted cash flow analysis and option pricing models making as much use of available and supportable market data as possible).

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

Interest income on debt securities - included in the change in fair value of such investments and recorded on the accrual basis.

Real Return Bond Fund (PIM) SF820

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

Miscellaneous income (loss)

Miscellaneous income (loss) generally includes the changes in foreign exchange rates between trade and settlement dates, foreign exchange rates on bank balances, securities lending income, derivative income, and management fee rebates.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

Real Return Bond Fund (PIM) SF820

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

k) Income Allocation

Net gain (loss) on investments, which includes interest income, realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the net asset value (NAV) per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Transaction Costs

Transaction costs, such as brokerage commissions, incurred in the purchase and sale of securities by the Fund are charged to expenses in the year.

n) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

Real Return Bond Fund (PIM) SF820

Notes to the Financial Statements

(in Canadian \$ thousands)

3. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

Portfolio units are those units owned by the Asset Allocation Funds. Each Portfolio fund is represented by a separate category.

The categories of units, and the various levels within each, are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Real Return Bond Fund (PIM) SF820

Notes to the Financial Statements

(in Canadian \$ thousands)

4. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

5. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

6. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Real Return Bond Fund (PIM) SF820

Notes to the Financial Statements

7. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by the Company. All investment transactions with the corresponding underlying funds are at quoted market prices.

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	4.79	1.71	3.06	3.24	8.23

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
MONTHLY INCOME FUND (L) SF821

December 31, 2024

Independent Auditor's Report

To the Contractholders of Monthly Income Fund (L) SF821 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Monthly Income Fund (L) SF821

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Monthly Income Fund (L) SF821 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Monthly Income Fund (L) SF821

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Monthly Income Fund (L) SF821

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Monthly Income Fund (L) SF821

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Monthly Income Fund (L) SF821

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Monthly Income Fund (L) SF821

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Monthly Income Fund (L) SF821

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Monthly Income Fund (L) SF821

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Monthly Income Fund (L) SF821

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Mackenzie Financial Corporation, which operates as Mackenzie Investments. All investment transactions with the corresponding underlying funds are at quoted market prices.

Monthly Income Fund (L) SF821

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Monthly Income Fund (L) SF821

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Monthly Income Fund (L) SF821

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	2.61	2.59	2.59	2.54	2.53

PPS 75/100 guarantee policy	1.21	1.20	1.19	1.14	1.15

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	—	0.02	114.51	75.81	28.77

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
GLOBAL MONTHLY INCOME FUND (L) SF822

December 31, 2024

Independent Auditor's Report

To the Contractholders of Global Monthly Income Fund (L) SF822 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Global Monthly Income Fund (L) SF822

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Global Monthly Income Fund (L) SF822 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Global Monthly Income Fund (L) SF822

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Global Monthly Income Fund (L) SF822

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Global Monthly Income Fund (L) SF822

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Global Monthly Income Fund (L) SF822

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Global Monthly Income Fund (L) SF822

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Global Monthly Income Fund (L) SF822

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Global Monthly Income Fund (L) SF822

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Global Monthly Income Fund (L) SF822

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Mackenzie Financial Corporation, which operates as Mackenzie Investments. All investment transactions with the corresponding underlying funds are at quoted market prices.

Global Monthly Income Fund (L) SF822

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Global Monthly Income Fund (L) SF822

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020

Portfolio Turnover Rate (%) ⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	5.18	7.04	117.39	56.14	17.48

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Independent Auditor's Report

To the Contractholders of Diversified Fund (GLC) SF823 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Diversified Fund (GLC) SF823

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Diversified Fund (GLC) SF823 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Diversified Fund (GLC) SF823

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Diversified Fund (GLC) SF823

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Diversified Fund (GLC) SF823

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Diversified Fund (GLC) SF823

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Diversified Fund (GLC) SF823

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Diversified Fund (GLC) SF823

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Diversified Fund (GLC) SF823

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Diversified Fund (GLC) SF823

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Mackenzie Financial Corporation, which operates as Mackenzie Investments. All investment transactions with the corresponding underlying funds are at quoted market prices.

Diversified Fund (GLC) SF823

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Diversified Fund (GLC) SF823

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Diversified Fund (GLC) SF823

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020
75/75 guarantee policy	2.61	2.59	2.59	2.57	2.54

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	0.20	0.17	114.65	33.67	5.91

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

DIVERSIFIED FIXED INCOME FUND (PSG) SF824

December 31, 2024

Independent Auditor's Report

To the Contractholders of Diversified Fixed Income Fund (PSG) SF824 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Diversified Fixed Income Fund (PSG) SF824

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Diversified Fixed Income Fund (PSG) SF824 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Diversified Fixed Income Fund (PSG) SF824

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Diversified Fixed Income Fund (PSG) SF824

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Diversified Fixed Income Fund (PSG) SF824

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Diversified Fixed Income Fund (PSG) SF824

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Diversified Fixed Income Fund (PSG) SF824

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Diversified Fixed Income Fund (PSG) SF824

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Emperor,
- Flex,
- Generations/Mosaic,
- Generations I,
- Generations II,
- Generations Core,
- Prestige/Prestige Plus, and
- Private Collections.

In addition to the Individual units, units are available for:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Diversified Fixed Income Fund (PSG) SF824

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Diversified Fixed Income Fund (PSG) SF824

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Diversified Fixed Income Fund (PSG) SF824

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Diversified Fixed Income Fund (PSG) SF824

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	33.33	9.51	13.31	14.57	4.06

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Independent Auditor's Report

To the Contractholders of Equity/Bond Fund (GLC) SF825 (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Equity/Bond Fund (GLC) SF825

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Equity/Bond Fund (GLC) SF825 (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Equity/Bond Fund (GLC) SF825

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Equity/Bond Fund (GLC) SF825

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Equity/Bond Fund (GLC) SF825

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Equity/Bond Fund (GLC) SF825

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Equity/Bond Fund (GLC) SF825

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Equity/Bond Fund (GLC) SF825

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Equity/Bond Fund (GLC) SF825

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Equity/Bond Fund (GLC) SF825

Notes to the Financial Statements

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Mackenzie Financial Corporation, which operates as Mackenzie Investments. All investment transactions with the corresponding underlying funds are at quoted market prices.

Equity/Bond Fund (GLC) SF825

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Equity/Bond Fund (GLC) SF825

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Portfolio Turnover Rate (%) ⁽²⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	4.16	4.55	85.53	53.89	9.53

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

GLOBAL GROWTH BALANCED FUND 1.05TRP

December 31, 2024

Independent Auditor's Report

To the Contractholders of Global Growth Balanced Fund 1.05TRP (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Global Growth Balanced Fund 1.05TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Global Growth Balanced Fund 1.05TRP (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Global Growth Balanced Fund 1.05TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Global Growth Balanced Fund 1.05TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Global Growth Balanced Fund 1.05TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Global Growth Balanced Fund 1.05TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Global Growth Balanced Fund 1.05TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Global Growth Balanced Fund 1.05TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Global Growth Balanced Fund 1.05TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Global Growth Balanced Fund 1.05TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.

Global Growth Balanced Fund 1.05TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Global Growth Balanced Fund 1.05TRP

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Global Growth Balanced Fund 1.05TRP

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

For the years ended December 31	2024	2023	2022	2021	2020

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	9.99	9.81	11.58	1.85	0.96

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

THE CANADA LIFE ASSURANCE COMPANY
RISK-MANAGED CONSERVATIVE INCOME
PORTFOLIO FUND 1.21IL

December 31, 2024

Independent Auditor's Report

To the Contractholders of Risk-Managed Conservative Income Portfolio Fund 1.21IL (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Risk-Managed Conservative Income Portfolio Fund 1.21IL

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Risk-Managed Conservative Income Portfolio Fund 1.21IL (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Risk-Managed Conservative Income Portfolio Fund 1.21IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Risk-Managed Conservative Income Portfolio Fund 1.21IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Risk-Managed Conservative Income Portfolio Fund 1.21IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Risk-Managed Conservative Income Portfolio Fund 1.21IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Risk-Managed Conservative Income Portfolio Fund 1.21IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Risk-Managed Conservative Income Portfolio Fund 1.21IL

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Risk-Managed Conservative Income Portfolio Fund 1.21IL

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Risk-Managed Conservative Income Portfolio Fund 1.21IL

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Irish Life Investment Managers Limited. All investment transactions with the corresponding underlying funds are at quoted market prices.

Risk-Managed Conservative Income Portfolio Fund 1.21IL

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Risk-Managed Conservative Income Portfolio Fund 1.21IL

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

Portfolio Turnover Rate (%) ⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	12.12	66.03	28.01	8.74	3.78

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Independent Auditor's Report

To the Contractholders of Risk-Managed Balanced Portfolio Fund 1.22IL (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Risk-Managed Balanced Portfolio Fund 1.22IL

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Risk-Managed Balanced Portfolio Fund 1.22IL (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Risk-Managed Balanced Portfolio Fund 1.22IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Risk-Managed Balanced Portfolio Fund 1.22IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Risk-Managed Balanced Portfolio Fund 1.22IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Risk-Managed Balanced Portfolio Fund 1.22IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Risk-Managed Balanced Portfolio Fund 1.22IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Risk-Managed Balanced Portfolio Fund 1.22IL

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Risk-Managed Balanced Portfolio Fund 1.22IL

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Irish Life Investment Managers Limited. All investment transactions with the corresponding underlying funds are at quoted market prices.

Risk-Managed Balanced Portfolio Fund 1.22IL

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Risk-Managed Balanced Portfolio Fund 1.22IL

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Risk-Managed Balanced Portfolio Fund 1.22IL

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

Portfolio Turnover Rate (%) ⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	7.18	49.69	21.63	0.92	0.02

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

December 31, 2024

Independent Auditor's Report

To the Contractholders of Risk-Managed Growth Portfolio Fund 1.23IL (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Risk-Managed Growth Portfolio Fund 1.23IL

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Risk-Managed Growth Portfolio Fund 1.23IL (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Risk-Managed Growth Portfolio Fund 1.23IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Risk-Managed Growth Portfolio Fund 1.23IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Risk-Managed Growth Portfolio Fund 1.23IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Risk-Managed Growth Portfolio Fund 1.23IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Risk-Managed Growth Portfolio Fund 1.23IL

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Risk-Managed Growth Portfolio Fund 1.23IL

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Risk-Managed Growth Portfolio Fund 1.23IL

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Risk-Managed Growth Portfolio Fund 1.23IL

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Irish Life Investment Managers Limited. All investment transactions with the corresponding underlying funds are at quoted market prices.

Risk-Managed Growth Portfolio Fund 1.23IL

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Risk-Managed Growth Portfolio Fund 1.23IL

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Risk-Managed Growth Portfolio Fund 1.23IL

Supplemental Information *(unaudited)*

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾

Portfolio Turnover Rate (%) ⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	9.08	33.52	37.10	6.81	0.60

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The Company has waived a portion of the fees for the Preferred Series 1 and Preferred Partner Series guarantee policies. There is no obligation for the Company to continue waiving these fees and it may cease to do so at any time without notice.

(3) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

Independent Auditor's Report

To the Contractholders of Index ETF Conservative Portfolio Fund 1.99PSG (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Index ETF Conservative Portfolio Fund 1.99PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Index ETF Conservative Portfolio Fund 1.99PSG (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Index ETF Conservative Portfolio Fund 1.99PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Index ETF Conservative Portfolio Fund 1.99PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Index ETF Conservative Portfolio Fund 1.99PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Index ETF Conservative Portfolio Fund 1.99PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Index ETF Conservative Portfolio Fund 1.99PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Index ETF Conservative Portfolio Fund 1.99PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Index ETF Conservative Portfolio Fund 1.99PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Index ETF Conservative Portfolio Fund 1.99PSG

Notes to the Financial Statements

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Index ETF Conservative Portfolio Fund 1.99PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Index ETF Conservative Portfolio Fund 1.99PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Index ETF Conservative Portfolio Fund 1.99PSG

Supplemental Information (unaudited)

The following tables show selected key financial information about the Fund and are intended to help users of the financial statements understand the Fund's financial performance.

Management Expense Ratio (%) ⁽¹⁾⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020

Portfolio Turnover Rate (%) ⁽²⁾⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	12.74	26.44	0.27	—	—

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

(3) The Fund commenced on October 24, 2022 and as a result does not have comparative figures for the prior years.

INDEX ETF BALANCED PORTFOLIO FUND 2.00PSG

December 31, 2024

Independent Auditor's Report

To the Contractholders of Index ETF Balanced Portfolio Fund 2.00PSG (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Index ETF Balanced Portfolio Fund 2.00PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Index ETF Balanced Portfolio Fund 2.00PSG (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Index ETF Balanced Portfolio Fund 2.00PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Index ETF Balanced Portfolio Fund 2.00PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Index ETF Balanced Portfolio Fund 2.00PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Index ETF Balanced Portfolio Fund 2.00PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Index ETF Balanced Portfolio Fund 2.00PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Index ETF Balanced Portfolio Fund 2.00PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Index ETF Balanced Portfolio Fund 2.00PSG

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Index ETF Balanced Portfolio Fund 2.00PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Index ETF Balanced Portfolio Fund 2.00PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Portfolio Turnover Rate (%) ⁽²⁾⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	2.72	16.99	27.51	—	—

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

(3) The Fund commenced on October 24, 2022 and as a result does not have comparative figures for the prior years.

THE CANADA LIFE ASSURANCE COMPANY
INDEX ETF GROWTH PORTFOLIO FUND 2.01PSG

December 31, 2024

Independent Auditor's Report

To the Contractholders of Index ETF Growth Portfolio Fund 2.01PSG (the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB") and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB and the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Index ETF Growth Portfolio Fund 2.01PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

1. THE FUND

The Index ETF Growth Portfolio Fund 2.01PSG (the Fund) is offered by The Canada Life Assurance Company (Canada Life or the Company).

The Company is the sole issuer of the insurance contracts providing for investment in the Fund. The assets of the Fund are owned by the Company and are segregated from the other assets of the Company. The Fund is not a separate legal entity. The Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for the contractholders, who are the ultimate beneficiaries of the Fund. The Fund's investment activities are overseen by the Company.

The Company is a wholly-owned subsidiary of Great-West Lifeco Inc. (Lifeco), a publicly listed company incorporated and domiciled in Canada. Lifeco is a member of the Power Corporation of Canada (Power Corporation) group of companies and is a subsidiary of Power Corporation.

The Fund's registered office is at 100 Osborne Street North, Winnipeg, Manitoba, Canada, R3C 1V3.

The financial statements of the Fund as at and for the year ended December 31, 2024 were approved for issue by the Company on March 13, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The financial statements of the Fund have been prepared in compliance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). Uniform accounting policies were applied in the preparation of the Fund's financial statements. The financial statements of the Fund have also been prepared in accordance with the requirements of Part XII of the Canadian Life and Health Insurance Association Guideline G2.

a) Use of Estimates, Significant Accounting Judgments and Assumptions

The preparation of the Fund's financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the reported amount of assets and liabilities at the reporting date and the reported amount of revenues and expenses during the reporting period. The valuation of investments is the most significant component of the financial statements subject to estimates. Although some variability is inherent in these judgments and assumptions, the Fund believes that the amounts recorded are reasonable.

When the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, the fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this information is not available, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statement of Financial Position and the level where the financial instruments are disclosed in the fair value hierarchy. Actual results could differ from these estimates.

Index ETF Growth Portfolio Fund 2.01PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

The Company is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9, *Financial Instruments*. The Company has assessed the Fund's business model, the manner in which all financial instruments are managed and the requirements of other accounting standards, and has concluded that fair value through profit and loss (FVTPL) provides the most appropriate measurement and presentation of the Fund's financial instruments.

Entities that meet the definition of an investment entity within IFRS 10, *Consolidated Financial Statements* are required to measure their subsidiaries at FVTPL rather than consolidate them. The criteria that define an investment entity are as follows:

- An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In the judgment of management, the Fund meets the definition of an investment entity. This conclusion will be reassessed on a periodic basis, if any changes in criteria or circumstances exist.

b) Fair Value Measurement and Classification

The fair value of financial assets and liabilities have been categorized based upon the following fair value hierarchy:

Level 1: Fair value measurements utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Fund has the ability to access. Assets and liabilities utilizing Level 1 inputs include equity securities that are actively traded on an exchange, exchange-traded futures and underlying mutual funds which have available prices in an active market with no redemption restrictions.

Level 2: Fair value measurements utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 assets and liabilities include those priced using a matrix which is based on credit quality and average life, and generally include some private bonds and equities, most investment-grade and high-yield corporate bonds, most asset-backed securities, most over-the-counter derivatives, and mortgage loans.

Level 3: Fair value measurements utilize one or more significant inputs that are not based on observable market inputs and include situations where there is little, if any, market activity for the asset or liability. The values of the majority of Level 3 securities were obtained from single broker quotes, internal pricing models, or external appraisers. Assets and liabilities utilizing Level 3 inputs generally include certain bonds and private investments.

Index ETF Growth Portfolio Fund 2.01PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair values of financial instruments are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. Additional disclosures relating to transfers between levels and a reconciliation of beginning and ending balances in Level 3 are included in the notes to the Schedule of Investment Portfolio, where applicable.

Level 3 financial instruments are reviewed on a periodic basis by the Company. The Company considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognized as standard within the industry. The Company estimates the fair value of bonds not traded in active markets by referring to actively traded securities with similar attributes, dealer quotations, matrix pricing methodology, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating, term, coupon rate and position in the capital structure of the issuer, as well as, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets, valuations are adjusted to reflect illiquidity, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Transfers into Level 3 are due primarily to decreased observability of inputs in valuation methodologies. Transfers out of Level 3 are due primarily to increased observability of inputs in valuation methodologies as evidenced by corroboration of market prices with multiple pricing vendors.

The Fund's fair value hierarchy classification of its assets and liabilities is included in note 9 on Financial Instrument Risk Management.

Upon initial recognition, the Fund classifies and measures all financial assets and financial liabilities in the Statement of Financial Position at FVTPL. The financial assets and financial liabilities are recognized when the Fund becomes a party to the contractual requirements of the instrument. Financial instruments are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. As such, investment purchase and sale transactions are recorded as of the trade date. The Fund's policy is not to apply hedge accounting.

Index ETF Growth Portfolio Fund 2.01PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

c) Investment Fund Units

Investment fund units are recorded at fair value, which is the closing net asset value (NAV) per unit of the underlying fund.

d) Cash, Short-term Deposits and Overdrafts

Cash, short-term deposits and overdrafts are comprised of cash on deposit, short-term deposits and overdrafts with terms to maturity of less than three months at acquisition. Due to the nature of these assets being highly liquid and having short terms to maturity, these items are reported at fair value, which approximates their cost.

e) Classification of Units Issued by the Fund

The units of the Fund are classified as financial liabilities under IFRS as the Fund is contractually obligated to repurchase or redeem them for cash or another financial asset when the units are disposed. The net assets attributable to contractholders are classified as FVTPL.

f) Recognition of Investments and Income

Financial investment purchases and sales are recorded when the Fund becomes a party to the contractual provisions of the instrument on a trade date basis.

Financial assets and financial liabilities at FVTPL are recorded in the Statement of Financial Position at fair value.

The accrual basis of accounting is used to record all types of investment income earned and expenses incurred by the Fund.

The following are included in net gain (loss) on investments on the Statement of Comprehensive Income:

Realized gains (losses) on investments - recorded upon the sale or maturity of an asset and determined using the average cost basis.

Unrealized gains (losses) on investments - calculated as the in-year change in fair value of the investment and determined using the average cost basis.

After initial measurement, the Fund classifies and measures financial instruments as FVTPL at the reporting date. Changes in the fair value are recorded in net gain (loss) on investments in the Statement of Comprehensive Income.

Index ETF Growth Portfolio Fund 2.01PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Foreign currency

The financial statements have been presented in Canadian dollars, which is the currency of the primary economic environment in which the Fund is domiciled and is the Fund's functional currency.

Foreign currency translations are calculated using the exchange rate in effect when the transaction occurred. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gains or losses generated by foreign exchange are recorded in the Statement of Comprehensive Income within net gain (loss) on investments.

g) Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

h) Amounts Due to/from Broker

Amounts due to brokers are payables for securities purchased that have been contracted for, but not yet delivered, on the reporting date.

Amounts due from brokers include margin accounts and receivables for securities sold that have been contracted for, but not yet delivered, on the reporting date.

Amounts due to/from brokers are held at fair value which approximates their cost.

Amounts due to/from brokers are settled within a few business days of the reporting date. All securities are purchased and sold in regular way transactions.

i) Amounts Due to/from Outside Parties

Amounts due to outside parties are payables to parties other than related parties of the Fund.

Amounts due from outside parties are receivables due from parties other than related parties of the Fund.

Amounts due to/from outside parties are held at fair value which approximates their cost.

j) Other Expenses

Other expenses consist primarily of securities handling charges. All these expenses are paid to third parties. The accrual basis of accounting is used to record all types of expenses incurred by the Fund.

Index ETF Growth Portfolio Fund 2.01PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

k) Income Allocation

Net gain (loss) on investments, which includes realized gains and losses and unrealized gains and losses, accrues to each contractholder through the increase (decrease) of the NAV per unit.

l) Issue and Redemption of Units

Units attributable to contractholders are redeemable at the contractholders' option at prices based on the Fund's NAV per unit at the time of redemption and are therefore classified as financial liabilities.

Units are issued and redeemed at their NAV per unit established as noted in the information folder of the Fund.

The Fund's obligation for net assets attributable to contractholders is presented at the redemption amount at the reporting date. The deposits and withdrawals of contractholders are adjusted for inter-fund transfers.

m) Future Accounting Policies

In April 2024, the IASB published IFRS 18, *Presentation and Disclosure in Financial Statements* (IFRS 18). The standard aims to improve how companies communicate information in their financial statements, with a focus on information about financial performance in the statement of earnings.

The standard is effective for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. The Fund is evaluating the impact of the adoption of this standard.

3. INVESTMENT FUND UNITS

Investment fund units of the Fund invest solely in units of other segregated investment funds of Canada Life. Units are valued based on the closing unit values of the underlying funds.

Investment activity of the underlying fund indirectly exposes the Fund to financial risk. See note 9 on Financial Instrument Risk Management.

Index ETF Growth Portfolio Fund 2.01PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

4. DESCRIPTION OF UNITS

The capital of the Fund is divided into categories of units.

Individual units are available to individuals for investment in:

- Registered Retirement Savings Plans,
- Registered Savings Plans,
- Tax Free Savings Accounts, and
- Non-Registered Savings Plans through the purchase of an Individual Savings Contract or a Retirement Income Fund.

Individual units are available under these different options:

- Option S1R 75/75 guarantee policy,
- Option S1HB Preferred Series 1 (PS1) 75/75 guarantee policy,
- Option S1HU Preferred Series 2 (PS2) 75/75 guarantee policy,
- Option S1RF Partner Series (PS) 75/75 guarantee policy,
- Option S1HF Preferred Partner Series (PPS) 75/75 guarantee policy,
- Option S2R 75/100 guarantee policy,
- Option S2HB PS1 75/100 guarantee policy,
- Option S2HU PS2 75/100 guarantee policy,
- Option S2RF PS 75/100 guarantee policy,
- Option S2HF PPS 75/100 guarantee policy,
- Option S3R 100/100 guarantee policy,
- Option S3HB PS1 100/100 guarantee policy,
- Option S3HU PS2 100/100 guarantee policy,
- Option S3RF PS 100/100 guarantee policy, and
- Option S3HF PPS 100/100 guarantee policy.

The categories of units are accounted for separately and any increases or decreases in net assets attributable to contractholders during the year are allocated proportionately to each category.

Index ETF Growth Portfolio Fund 2.01PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

5. CAPITAL MANAGEMENT

The Fund is not subject to externally imposed capital requirements and has no legal restrictions on the issue, repurchase or resale of redeemable units beyond those included in the Fund's offering document. Units are redeemed at the NAV per unit of a Fund on the redemption date. The capital received by a Fund is utilized within the respective investment mandate of the Fund.

6. INCOME TAXES

The Fund is deemed to be a trust under the provisions of the *Income Tax Act* (Canada). Income of a segregated fund is deemed to be payable to the contractholders and therefore the Fund will not have taxable income. In addition, capital gains and losses are deemed to be those of the contractholders and not of the Fund. Realized gains or losses may be reduced by the amount of gains or losses realized by contractholders on the redemption of their investment. As a result, no provision of income tax is required in the financial statements of the Fund.

Foreign investment income is subject to withholding tax deducted at the source of the income in some jurisdictions. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income. The Fund presents the withholding tax separately from the net gain (loss) on investments in the Statement of Comprehensive Income.

7. NET ASSETS ATTRIBUTABLE TO CONTRACTHOLDERS PER UNIT

The presentation of unit values is broken down by contractholder category.

Net increase (decrease) in net assets from operations attributable to contractholders per unit per category is calculated by dividing the net increase (decrease) in net assets attributable to contractholders from operations as disclosed in the Statement of Comprehensive Income, by the weighted average number of units of each category outstanding during the year.

Index ETF Growth Portfolio Fund 2.01PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

8. RELATED PARTY TRANSACTIONS

Lifeco is the parent of the Company as well as a member of the Power Corporation group of companies. Through this relationship, the Company is related to IGM Financial Inc., a company in the financial services sector, along with its subsidiaries I.G. Investment Management, Ltd. and Mackenzie Financial Corporation.

The financial statements of the Fund may include transactions with the following related parties to the Company:

Related party	Relationship	Incorporated in
Canada Life Investment Management Ltd.	Wholly-owned subsidiary of the Company	Canada
Setanta Asset Management Limited	Indirect wholly-owned subsidiary of the Company	Ireland
Putnam Investments, LLC ⁽¹⁾	Wholly-owned subsidiary of Lifeco	United States
IGM Financial Inc.	Subsidiary of Power Corporation	Canada
Canada Life Asset Management Limited	Indirect wholly-owned subsidiary of the Company	United Kingdom
Irish Life Investment Managers Limited	Indirect wholly-owned subsidiary of the Company	Ireland

⁽¹⁾ On January 1, 2024, Lifeco completed the sale of Putnam US Holdings I, LLC (excluding PanAgora Holdings Inc. and its subsidiary PanAgora Asset Management Inc.) to Franklin Resources Inc. Putnam US Holdings I, LLC was a subsidiary of Putnam Investments, LLC and was the indirect parent company of Putnam Investments Canada ULC, which managed certain segregated funds for the Company.

- a) The Company provides management, advisory and administrative services to the Fund which includes the services of key management personnel. In respect of these services, the Fund is charged management and other fees that are at market terms and conditions. Management and other fees for Preferred Series 2 categories are charged directly to the contractholder by redeeming units from their policy. Management fees and other fees charged to other categories are calculated at set rates applied against the net assets of the specific category at each valuation date.
- b) The amounts shown as "Due from (to) The Canada Life Assurance Company" represent outstanding management fees, uncleared deposits/withdrawals and investment activity as at the December 31 valuation dates of the Fund.
- c) The Fund invests in assets or underlying funds managed by Canada Life Investment Management Ltd. All investment transactions with the corresponding underlying funds are at quoted market prices.

Index ETF Growth Portfolio Fund 2.01PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT

a) Risk Management

The Fund's investment activities expose it to a variety of financial risks. The Schedule of Investment Portfolio presents the securities held by the Fund as at December 31, 2024. The following sections describe the significant risks that are relevant to the Fund.

The Fund employs a passive investment strategy whereby investments in underlying funds are based on target asset weightings. The target weightings allocated to each underlying fund and the selection of underlying funds are based on several factors, including impact to the Fund's volatility and asset class diversification. Significant changes to the selection of underlying funds or the target asset weightings attributed to each underlying fund require contractholder notification. To assist with managing risk, the Fund Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and other regulations. Financial statements for the underlying funds, which include discussions about their respective risk exposure, are available upon request.

b) Liquidity Risk

Liquidity risk arises when a Fund encounters difficulty in meeting its financial obligations as they come due. The Fund is exposed to liquidity risk due to potential daily cash redemptions of redeemable units. As the Fund primarily invests all of its net assets in the underlying funds, liquidity risk is mitigated by the underlying funds' ability to meet the obligation to fund daily cash redemptions of their redeemable units/shares. In addition, the underlying funds retain sufficient cash and cash equivalent positions to maintain adequate liquidity.

c) Currency Risk

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Fund's reporting currency, will fluctuate due to changes in exchange rates. The Fund's investments in all underlying funds are denominated in Canadian dollars. However, the Fund is indirectly exposed to currency risk to the extent that the investments of the underlying funds are denominated or traded in a foreign currency.

d) Interest Rate Risk

Interest rate risk arises on interest-bearing financial instruments such as bonds. The Fund does not directly hold any interest-bearing financial instruments. The Fund is indirectly exposed to the risk that the value of interest-bearing financial instruments held by the underlying funds will fluctuate due to changes in the prevailing levels of market interest rates.

e) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The Fund has no direct exposure to credit risk. The greatest indirect concentration of credit risk is in debt securities, such as bonds, held by underlying funds. The fair value of debt securities includes consideration of the creditworthiness of the debt issuer. The carrying amount of debt investments represents the maximum credit risk exposure as at December 31, 2024.

Index ETF Growth Portfolio Fund 2.01PSG

Notes to the Financial Statements

(in Canadian \$ thousands)

9. FINANCIAL INSTRUMENT RISK MANAGEMENT (continued)

f) Other Price Risk

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate, currency or credit risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All securities present a risk of loss of capital. For the instruments held by the Fund, maximum risk of loss is equivalent to their fair value. The Fund Manager moderates this risk through a careful selection of underlying funds within the parameters of the investment strategy.

g) Fair Value Classification

Investment Fund Units are recorded at fair value, which is the closing NAV per unit of the underlying fund. This valuation is considered to be a Level 2 classification.

Portfolio Turnover Rate (%) ⁽²⁾⁽³⁾

For the years ended December 31	2024	2023	2022	2021	2020
Portfolio Turnover Rate	4.55	9.64	0.29	—	—

(1) The management expense ratio has been calculated as the aggregate of all fees, taxes, charges and other expenses incurred during the year divided by the average daily net asset value of the segregated fund attributable to the particular fee option. All ratios shown are on an annual basis. In circumstances where the particular fund or fee option did not have twelve months of exposure, the ratios have been annualized. Management expense ratios are calculated for Individual Customer, Wealth Solutions clients only. No management expense ratio is calculated for the Preferred Series 2 guarantee policy as such fees are charged directly to the contractholder.

(2) The portfolio turnover rates presented in the financial statements reflects the Canadian Life and Health Insurance Association Inc. (CLHIA) Guideline G2, Individual Variable Insurance Contracts Relating to Segregated Funds 12.3(a)(iii). The portfolio turnover rates indicate how actively the portfolio investments have been bought or sold throughout the year. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year.

(3) The Fund commenced on October 24, 2022 and as a result does not have comparative figures for the prior years.
